FSLC HRP 2024 prioritization and food assistance (CO1) gaps as of February 2024

Note: The gap is calculated as the people targeted in HRP 2024 minus people reached with GFD as of February 2024 in IPC 4 counties.

CONTEXT UPDATE

In the first projection period of December 2023 to March 2024 (harvest/ post-harvest season), the situation is projected to improve marginally as a result of seasonal availability of harvests. An estimated 5.79 million people (45.8 percent of the population) are projected to face IPC Phase 3 or above (Crisis or worse). 1.71 million people likely to be in Phase 4 (Emergency) and 25,000 people likely to be in Catastrophe (IPC Phase 5) acute food insecurity in Pibor including the returnees from Sudan.

During the first projection period, mitigating factors include the seasonal availability of harvested food stocks, improved road conditions during the dry season, improved income from the sale of harvests, increased availability of fish, and a reduction in human and animal water-borne diseases.

However, aggravating factors include reduced availability of livestock products like milk as a majority of animals move away from homesteads in search of water and pasturage, the start of food stock depletion for households that had poor harvests. The ongoing economic crisis and associated effects such as currency depreciation are likely to affect the purchasing power of poor households and to limit income earning opportunities in addition to the effects of the conflict in Sudan such as influx of returnees and refugees, and the disruption of supply chains for markets in the northern parts of the country.
