

Number of Targeted Beneficiaries Reached by Region

28 Reporting Partners

Activities by Modality

Percentage of Targeted Beneficiaries Reached per District

IPC Acute Food Security Situation as per FSNAU Post-Gu Season Assessment

Strategic Objective 1 Update

Food assistance, cash combined with livelihood support ("Cash+") and conditional transfers were the main responses that helped in improving immediate access to food of beneficiaries.

The overall level of response in September have shown a 25 percent increase across most regions as compared to last month. This increase has reversed the decline of the IANS response trend over the last three months. This is due to the positive effect of partners in containing acute food insecurity in certain regions as reported by the FSNAU. Unconditional transfer assistance was delivered by WFP (57%), FAO (7%) and CWV (6%).

Although the humanitarian effort has been robust, two years of drought have contributed to an alarming rate of deterioration in food security. While IPC 3&4 figures are projected to lower slightly from Aug-Dec 2017, the trend suggests that there will be further deterioration. To deter this, it is critical that partners simultaneously improve access to food, increase livelihoods assets and promote the resilience of the affected population.

Monthly Trend Line – Beneficiaries Reached

Save the Children partners with sQuid (e-vouchers) to deliver an aid programme in drought-affected Somalia. (SCI)
