

West Mosul displacement scenario – 30 May, 2017

Food Security Cluster is planning for an updated displacement scenario in and around the Old City of Mosul. The current operational planning figure is 180,000 individuals who are residing in or around the Old City of Mosul. The current scenario is accounting for large scale displacements on a daily rate of 10,000 individuals per day with peak periods of 20,000 or more individuals per day.

There are a total of five expected displacement pathways from the old city to safer areas of the city (not in any ranking order):

1. Ninewah Hotel mustering point & screening site
2. 9th Division assembly point
3. Thawra mustering point
4. Fed Pol assembly & mustering points
5. 5th Bridge mustering point & screening site

Transition of assistance and recommended activities

Families vulnerable to food insecurity will receive assistance through a sequenced approach throughout the displacement route focusing on the transition from immediate access to lifesaving food assistance to regular, stabilizing monthly food assistance.

Assembly points and mustering points

As vulnerable displaced families leave areas with active fighting, initial food assistance from humanitarian actors is focusing on light, mobile food kits. Partners have reported stocks and plans for light assistance consisting of biscuits, water, fruit and other mixed food items. This initial assistance is intended to provide some immediate assistance to ensure newly accessible populations have some support before the transportation and reception process at screening sites.

Screening and reception sites

Upon arrival at a screening or reception site, food actors are planning to provide ready to eat rations (RTER) or immediate response rations (IRR) from the RRM Consortium partners. These RTER/IRR provide immediate access to food with smaller, mobile kits supporting a household's food needs for 3 days. As these rations are targeting highly mobile populations, they are intended to be "ready to eat" – not requiring any processing or cooking. Some food actors have reported some prepositioning stock.

Camps and other formal sites

Upon arrival at camps and other formal sites, food actors are planning to provide immediate access to food with parallel RTER/IRR and dry food rations. The provision of RTER/IRR for arrivals at camps is intended help mitigate any gap between arrival and the cooking stoves and related items needed to process dry food rations. Once cooking stoves and related items are available, new arrivals will receive the dry food ration supporting a household's food needs for 30 days. WFP, through its partners, is planning a nutritional preventative supplement to align with food assistance to prevent Moderate Acute Malnutrition (MAM) for children aged between 6 – 59 months.

Partner presence and available stocks

Reported partner presence (May)		
Ninewah Hotel mustering point & screening site		
Activity	Partner(s) in area	Primary actor
RTER/IRR	QRCS	TBC
Badush mustering point & screening site		
Activity	Partner(s) in area	Primary actor
RTER/IRR	Muslim Aid	Muslim Aid
Scorpion junction screening site		
Activity	Partner(s) in area	Primary actor
RTER/IRR	SIF, Muslim Aid	Muslim Aid
Abu Sayf screening site		
Activity	Partner(s) in area	Primary actor
RTER/IRR	Muslim Aid, Oxfam	Muslim Aid
5th Bridge mustering point & screening site		
Activity	Partner(s) in area	Primary actor
RTER/IRR	MoMD	MoMD - TBC
Hammam Al-Aleil screening site		
Activity	Partner(s) in area	Primary actor
RTER/IRR	NRC	NRC

Assembly points & locations – reported presence (May)		
East of 17 July Neighborhood		
Activity	Partner(s) in area	Primary actor
Light assistance	SIF, QRCS	SIF - TBC
9th Division assembly point		
Activity	Partner(s) in area	Primary actor
RTER/IRR	Muslim Aid	Muslim Aid
Thawra assembly point		
Activity	Partner(s) in area	Primary actor
RTER/IRR	Muslim Aid	Muslim Aid
FedPol assembly point		
Activity	Partner(s) in area	Primary actor
RTER/IRR	Oxfam	Oxfam

Reported stocks (30 May)

Several Food Security actors reported available food stocks in or around Mosul city for operational use:

Organization	Activity	Duration	Stock	Households	Individuals	Status
WFP	Dry food rations	30 days	460,000	460,000*	2,300,000	Operational
WFP – MA	Dry food rations	30 days	11,000	11,000	55,000	Operational
WFP – MH	Dry food rations	30 days	11,000	11,000	55,000	Operational
SIF	Ready to eat rations	1 day	1,157	1,157	5,785	Operational
SIF	Ready to eat rations	1 day	15,000	15,000	75,000	May 31st
MoMD	Ready to eat rations	1 day	180,000	180,000	TBC	Operational
MoMD	Dry food parcels	30 days	180,000	180,000	900,000	Operational
Other food actor	Dry food rations	30 days	30,000	30,000*	180,000	Operational
Other food actor	Dry food rations	30 days	100,000	100,000*	600,000	Mid - June

Logistics Support

The Logistics Cluster has common storage available in key operational locations to the south and east of Mosul, including in Gogjali, the Hamam al 'Alil camps (UNHCR and MODM), the Qayarraah camps and Salamiyah camp, as well as to the north in Zummar. Partners can access common storage space at no cost; details on how to access these services can be found online: <http://www.logcluster.org/document/iraq-standard-operating-procedures-sop-transport-and-storage-april-2017>

The Logistics Cluster also has mobile storage units (MSUs) in stock in both Erbil and Dahuk which can be loaned out to humanitarian actors requiring further storage capacity. Two MSUs are currently erected at Scorpion Junction and available to support RRM/IRR activities.

For more information or questions, please contact info.iraq@fscluster.org

* This number is for stocks nationwide, and not exclusively for the Mosul response.
