3,416,210	

FSC Targeting

The target for each district/region shown on this map can be considered as an "indicative" seasonal target (dry season). FSC calculates it based on the population figures given for the IPC phases as assessed by the FSNAU. For strategic objective three (Livelihood Seasonal Inputs), the target includes: 100 percent of riverine and agro-pastoral population in IPC phases 3 (Crisis), 4 (Emergency) and 50 percent for IPC 2 (Stressed) for agricultural inputs support, plus 100 percent of the pastoral and agro pastoral in IPC phases 3 and 4; and 50 percent of pastoral and agro-pastoral in IPC phase 2 (Stressed) for livestock assets protection. Partners should treat these target figures as indicative, but it does not prevent them from going beyond the target if the local context warrants it.

The boundaries and names shown and the designations used on this map do not imply official endorsement or acceptance by the United Nations.
