REQUEST RECEIVED

- Requests are sent via email or phone
- **Requests are often incomplete and further information is needed**

DUE DILIGENCE

- Contact is made with the requesting organization to confirm entity, context and needs
- **Requesting organisations may not have all the data/info needed to plan for a response**

MATCHING PARTNER

- Contact is made with implementing partners who are operating in the area
- **Lack of planning information / difficult to know if partners have capacity to cover the request**

CONTACT WITH LOCAL AUTHORITIES

- Local authorities are contacted to determine if they know the requesting organization, if there are needs and whether they have been already addressed
- **Lack of contacts for some oblasts / municipalities**

FOLLOW UP

- Continued contact with requesting organization and FSLC partners to close the process.
- **Partners not responding to requests**
- **Assistance may have already been provided but not reported**

Recommendations

- Before submitting a request to the FSLC, requesting organizations should check with the local authorities first to determine the availability of stocks/kits at the local level and local capacities to provide assistance, this could also enable the combination of several requests which are easier to process
- When contacting the FSLC, requesting organization should provide as much information as possible including the total number of individuals (not just households), locations, distribution point, type of assistance required
- FSLC partners should provide planning information in the 5W to ensure pipeline visibility and enable the Cluster to identify partners' capacities to meet requests
- Partners should provide feedback for every request sent. If partners can action the request they should inform the FSLC of the tentative distribution date, and when and where the delivery was done
- Partners should include the information on the 5W once distributions have been completed.

- Digitalisation of the request for food assistance process (online/KoBo or via Activity Info)
- Development of detailed SOPs on how to process requests
- Improve gap analysis and partners planning/capacities
- Improve reporting of completed / actioned distributions
