Activities by Modality

- **Beneficiary Numbers**
  - In-Kind: 571,216
  - Cash / Voucher: 2,097,768

Number of Targeted Beneficiaries

- Reached: 2,668,984
- Not Reached: 549,716

Total Target: 3,218,700

Strategic Objective 1 Update

**Objective 1: Improved Access to Food and Safety Nets**

The improved Access to Food and Safety Net (IASN) has continued to be the focus of the partners in November like previous months. The partners collectively assisted 2,668,984 people out of 3.2 million targeted in various IASN type of assistance in November (accounting for 83 percent of the target). The overall level of response in November decreased by 442,000 beneficiaries (14%) as compared to October 2017. The decline in the FSC partners that reported and reduced response are worrying during this critical time where extreme food insecurity outlook is projected by FEWSNET.

Cash or voucher constitutes 79% of the total beneficiaries assisted with unconditional assistance in November while 21% received in-kind assistance (food distributions of various type).

WFP contributed for 64% of the overall response followed by CWW and DRC (6% each).
