Strategic Objective 1 Update

This response is an overall reduction of approximately 500,000 beneficiaries (19%) when compared to last month. January marks the third straight month where there has been a notable decline in the number of beneficiaries assisted. Additionally, the January 2018 figure is among the lowest recorded since the famine prevention scale up commenced in February 2017.

The reduction in beneficiaries assisted was all across Somalia except in Sanaag, Woqooyi Galbeed and Sool regions where this was either maintained or increased as compared to last month. The reported increase in Sool region (Laas Caanood, Taleex and Xudun districts) was very significant i.e. three fold as compared to last month.

In-kind assistance (food distributions of various type) constituted approx. 69% of the total beneficiaries assisted January whilst the remaining 31% of the beneficiaries received assistance in cash/cheque or voucher form.

The bulk of the assistance was delivered by three key partners who jointly covered 84 % of the reported caseload i.e. WFP (65%), FAO (15%) and DRC (4%). The remaining 16% of the total assistance was delivered by seventeen partners (17) making a total of 20 responders who shared data with the FSC for the January IASN report.
