Boda Talk Talk (BBTT) in UN House produces two audio programs weekly in Nuer, aired on speakers at designated locations throughout the PoCs. The BBTT Team also manages over 100 listening groups, which receive the programs on SD cards and give feedback to BBTT staff about important issues affecting the community.

**PROGRAMS OF THE WEEK**

**MATERNITY**
Although International Medical Corps (IMC) provides maternity health services free of charge to all IDPs in both PoCs, some pregnant women still give birth in their shelters where there is no medical expert to help. BBTT asks the trained IMC doctors and health care experts how to convince expecting women to come to the clinic to give birth rather than in the shelters.

**VOCATIONAL TRAINING**
After six months of intensive training in various vocational fields such as baker, carpentry and tailoring, 120 students in PoC3 including 60 women are graduating. The Norwegian Refugee Council (NRC) runs the training in order to empower the IDP residents with skills to earn an income.

**THE WEEK AHEAD**

**HIV/AIDS TESTING**
IMC and Jephaio carried out HIV/AIDS voluntary testing last month for residents of the PoCs. The need for ongoing dissemination of information about the sickness is still a health care priority. People are encouraged to get tested for HIV/AIDS, share ways on how to prevent getting the sickness, and seek treatment if someone tests positive.

**FOOD DISTRIBUTION**
WFP is planning to change some of the food items that are distributed in the upcoming months so this program provides accurate information about these changes in order to reduce unwanted and incorrect rumors circulating in the PoCs.

**UN House PoCs**

**WEEKLY e-BULLETIN**

*October 9 - 13, 2017*

**FEEDBACK FROM THE POC**

**MALARIA TESTING**
Residents have doubts about the blood tests in clinics since many are suffering from malaria so maybe the testing is not done right.

**NIGHT CLUBS**
New PoC leaders should stop the operation of night clubs because of crimes being committed at night.

**WATER MANAGEMENT**
Water service management is very poor at the block level. THESO should talk with block leaders to improve how and when water is available and there should be attendants at every water point.

**MEAT**
Some people go outside and bring meat into the PoC but it is not checked for health quality. There should be teams to check meat that is brought into the PoC to make sure it is OK.

**PUBLIC SERVICE ANNOUNCEMENTS**

**CSB+ DISTRIBUTION**
Concern Worldwide announces that CSB+ distribution will take place with the General Food Distribution in PoC1 at the distribution center. There are no private, special distributions of CSB+. Beneficiaries who do not receive their CSB+ monthly ration at the distribution center will have to wait until the next distribution.

**PoC1 NEW LEADERSHIP**
Next week is the scheduled time for the official inauguration of the new leadership selected to serve the next six-month term in PoC1.

Three World Vision workers make final preparations for the general food distribution in Zone J of PoC3 on Wednesday, October 11, 2017. The monthly provisions include 15 Kg maize, 1.5 Kg lentils, 0.9 Kg oil, and 0.15 Kg salt per person plus 4 CSB+ packets for children under five years old. ©INTERNEWS/Paul Gatluak Tong
