Photos

Joint Assessment - Metuge Naminawe

The site is not occupied

Total Area available – (???)

Expected number of IDPs to be hosted – Approximately 300HHs

Number of IDPs already in the village – 51

Amount of land to be given to IDPs for agricultural purpose (Farming land – Machambas) is 17ha However, The 51 IDPs have not yet been allocated areas for agriculture.

Plot size – 1 ha/IDP, and the distance from the community to the farming area is about 2Km

Number of IDPs that have already receive a plot: 10HHs which are living in the host families

Joint Assessment - Metuge -Naminawe

Water availability – Two operational manual water pumps and a periodic river nearby (200m)

Soil Quality – The soil texture is loamy - sanded , there is no risk of flooding

Main Crops to be grown – Maize, sesame, cowpea and vegetables (to be grown nearby the downstream periodic river at the distance of 1 km approximately)

The other area to grow vegetables is the irrigation scheme located to Sunho

Follow up

- IDPs to start preparing the land (debushing/bush clearing, removal of stones and rocks, ripping, and levelling of the soil
- Meeting between FSC members and partners in order to coordinate for a rapid response (provision of seeds and tools) as the rainy season is about to start.

Activities

Assess agricultural land and coordinate the distribution of agriculture inputs
