In May 2020, FSL cluster partners assisted over 1.3 million beneficiaries with emergency food assistance. 90% of the beneficiaries received in-kind food assistance while 8% received Cash and Vouchers support and 2% received hybrid intervention. The significant reduction in delivery during May was a result of double monthly ration distributions in April due to COVID-19 challenges.

Since January, WFP and FSL partners have reached over 3.6 million unique beneficiaries with emergency food assistance. On average, 1.6 million beneficiaries are receiving support month on month from a total of 47 different partners.

In the projection period of May to July 2020, a total of 6.48 million people (55.4% of the population) will face Crisis (IPC Phase 3) or worse acute food insecurity. Click here to download the IPC key messages.
