During the month of February 2021, FSL Cluster partners reported to have reached 1.6 million people with either in-kind food distribution, cash or vouchers modality in both rural and urban areas. Among them, 1,217,000 beneficiaries received in-kind food assistance and 27,368 cash-based assistance in rural zones, while the remaining 382,870 received cash-based support in urban areas.

The IPC analysis for the period Jan-Mar 2021 classifies 3.4 million people in class 3 or above for the rural area, while the HNO 2021 identifies 2.2 million people in need in Urban Area. The overall target in 2021 is 3.7 million people. Through data collected for the month of January, practically none of these 3.7 million people has been reached, apart from 55,000, which represents a very tiny fraction of the target. In fact, the 1.5 million people reported as reached are not included in the 3.7 million caseload of the target, as per IPC assumptions. This is particularly concerning, considering that January is the peak of the lean season.

The number of people reached include 9,493 under 2021 HRP.
Concurrently, a total of 67,625 beneficiaries were supported with agriculture and livelihood assistance. This includes 51,194 with training, extension and advisory services, 12,700 receiving training on and inputs for agro-ecology interventions such as soil conservation practices, soil reclamation techniques and restoration of degraded landscapes. 1,500 received horticulture seeds and other inputs / materials for household kitchen gardens (and related trainings, cooking demonstrations, etc.) while the remaining 1,468 receiving small livestock inputs.
