Wheat Imports Evolution (in mt) – January 2019 to January 2021

• Between January 2020 and October 2020, Lebanon imported 537,993 tons of wheat, based on the Lebanese Customs published data, 23% higher than the same period in 2019 (see blue line).

• Based on WFP shipment data, Lebanon imported 622,443 tons of wheat in 2020 through its Beirut & Tripoli ports (see orange line).

• Between August 2020 and January 2021, Lebanon imported 282,421 tons of wheat, 3% less than same period the previous year (290,908), through Beirut and Tripoli ports (Source: WFP shipment data).

• In January 2021, Lebanon imported 20,550 tons of wheat, versus 83,017 tons in January 2020 (down 75%).

Source: Lebanese Customs Data (blue line) & WFP Shipment Data (Beirut & Tripoli ports) (Orange line), January 2021, subject to change
• Based on WFP shipment data, Lebanon imported, through its Beirut & Tripoli Ports:
  • In 2020, 638,237 tons of animal food (corn, soya & Barley).
  • Between August 2020 and January 2021, 319,519 tons, versus 304,910 tons for the same period the previous year (up 5%).
  • In January 2021, 23,381 tons of animal food, versus 70,420 tons in January 2020 (down 67%).
86% of WFP-contracted shops reported to have more than 2 weeks of stocks.

Based on February 4th weekly shops assessment survey results:

- 57% of WFP contracted shops reported scarcity in certain products, such as oil & fats, fresh products and sugar.
- 63% of shops reported scarcity in the subsidized products.
- 41% of WFP-contracted shops reported suppliers not delivering the full ordered quantities.
- 74% reported having subsidized items at the rate of LBP 3,900.
- 46% reported that suppliers are accepting new orders for subsidized products.
- Only 3% of shops that received subsidized items reported receiving the full ordered quantities.

Change of Monthly revised food SMEB price in LPB (national average)

- Revised Food SMEB recorded a 7% increase between December 2020 and January, at LBP 139,138.
- The cost of the revised food SMEB in January 2021 is higher than August 2020, the date the basket was initially set, by 17%.
- In parallel with the revised Food SMEB, the monthly average unofficial exchange rate increased by 6% between December 2020 and January 2021.

Source: WFP price data, 2020, & 2021 as of 9 February 2021, subject to changes
The revised non-food items basket of 12 commodities is composed of the same items as the 2014 non-food basket, except hypoallergenic soap that was removed. The basket includes in addition 5 toothbrushes (changed every 3 months) and 5 blankets. Cooking gas quantity was further increased compared to the 2014 basket.

- Between August 2020 and January 2021, an increase of 16% was registered.
- Between December 2020 and January 2021, a 5% increase was registered.
Subsidies: Latest developments
Current Subsidization Mechanism in Lebanon

- Wheat imports are partially subsidized (85% of their cost) by the central bank at the official exchange rate.
- Combustible fuel imports are partially subsidized (90% of their cost) by the central bank at the official exchange rate.
- Medicine, medical equipment, and infant milk are partially subsidized (85% of their cost) by the central bank at the official exchange rate.
- Through circular 561, the central bank organized the subsidization mechanism.
- Importers of wheat and combustible fuel have to present a number of documents through their banks, following which they receive the needed funds in dollars at the official rate, based on the percentages shared above, which cover the cost of buying/importing these products. They should also provide the subsidized amount equivalent in LBP using banknotes exclusively.
- The central bank, in coordination with the Ministry of Economy, also subsidizes a basket of nearly 300 items Food and agricultural items, at the rate of LBP 3,900.
- Removal of subsidy will lead to importers having to cover the difference between exchanging the cost from dollars to LBP if they are using the informal exchange rate rather than the official exchange rate, a cost that they will most probably transfer to the end consumer.

Source: Lebanon Central Bank
Ministerial consultations regarding import subsidies removal/modification took place during the week of December 7th. Report sent to Parliament layout four scenarios to replace subsidies with ration cards for 600,000 Lebanese families, or more than 2.5 million people.

Additional meeting took place on February 2nd. Meetings deliberated on the subsidy program and relevant proposed scenarios. No decision taken yet.

Outgoing Prime Minister indicated at the end of December that the country has around USD 2 billion in reserves left for subsidies, which can last for six month if rationing was applied.

Removal of all subsidies is not expected, but rather a modification of included elements.

Gradual increase in the cost of subsidized combustible fuel (Gasoline, Diesel and Cooking Gaz) have been taking place since the beginning of December. Cost rising each week by roughly LBP 500 to LBP 1,000. In the last two months:

- Gasoline tank of 20L cost increased by 20 percent.
- Diesel tank of 20L cost increased by 25 percent.
- Cooking Gaz 10KG cylinder cost increased by 31 percent.
- Increases expected to continue in the coming few weeks.

Potential Impact of Subsidies Removal

• The below potential price increases assume an informal exchange rate of LBP 9,000.
• Additional depreciations of the LBP in the informal exchange rate market will lead to further increases in the cost of the different subsidized commodities.

• Bread:
  • A 930g loaf of bread costs today **LBP 2,500**. A 400g load of bread costs **LBP 1,750**.
  • Potential price increase of 1.5 to nearly 3.5 times the current price once subsidies are removed.

• Combustible Fuel:
  • Potential price increase of 3 to more than 5 times the current price once subsidies are removed.

• Subsidized Food Basket at the cost of LBP 3,900
  • Potential price increase of up to 131 percent once subsidies are removed.
  • **Note**: bread represents approximately 30% of the overall SMEB food basket of a Syrian refugee household.

• Medicine/medical equipment:
  • Potential price increase of up to 241 percent once subsidies are removed.

Latest Bread Price Inflation

• In June 2020, the price of a 900-gram loaf of bread was raised to LBP 2,000 from its pre-October 2019 crisis price of LBP 1,500; This was the first change in eight years.

• On January 11th 2021, price further changed to LBP 2,250 for the new 900-gram bread loaf price, while a medium size parcel with a minimum weight of 400 grams price was set at LBP 1,500.

• Decision further revised on February 1st 2021. New minimum weight of the large package of bread set at 930 grams and sold at LBP 2,500. Medium bread package continues to be set at a minimum of 400 grams but sold for LBP 1,750. This decision was taken:
  • Due to the rise of the global wheat prices, and based on the increase of manufacturing, distribution, and sales costs;
  • Iraqi flour donation ran out, which had been used at bakeries to produce bread since November 2020; and
  • The higher exchange rate of the US dollar against the Lebanese pound in the informal market.

• Ministry of Economy stated that the price would be further modified in the future depending on the US dollar exchange rate or the global wheat price movements.
