

In the month of April, cluster partners reported having reached 96,000 beneficiaries with either in-kind food distribution or cash-based transfers in both rural and urban areas. Among them, 78,000 beneficiaries received cash-based support in urban and peri-urban areas. 18,500 beneficiaries received in-kind food assistance in rural areas and the remaining 360 received cash-based assistance in rural areas.

The current reporting is consistent with the ongoing post lean season focus on resilience-building to strengthen livelihoods of the most vulnerable and gradually reduce the need for humanitarian assistance.
