

## Meeting with Livestock Partners

02 March 2022

Cox's Bazar, Bangladesh

**COX'S BAZAR  
FOOD SECURITY  
SECTOR**

Photo: ISCG / Saikat Mojumdur

# Agenda

- Preview of last meeting minutes and action points
- Message from District Livestock Officer (DLO)
- **Livestock activity reporting:** Update on 5W reporting for the livestock partners
- **Vaccination Campaign:** information sharing among livestock partners.
- Partner's presentation on Livestock by SOLIDARITES INTERNATIONAL and Practical Action.
- AoB

## FSS to---

- Prepare Livestock partner's activity tracker, Maps and dashboard for information update on livestock activities - On going
- Livestock activity will incorporate in 5W reporting template for partners reporting – by January 2022
- Livestock activity documents exchanged. – On going

## FSS Partners to

- include livestock program activities in 5W reporting for each month

# Message from DLO

# Documents Exchanged by Partners

---

- Livestock partners are requested to communicate with Upazila/District livestock officials for activity implementation
- Ensure livestock officials engagement for organizing technical trainings, input/livestock distribution, vaccination campaign programs.
- To share activity implementation progress report to the DLS regularly.
- To utilize DLS data/information and directives accordingly.

# Vaccination Campaign

- Partners planning to organize vaccination campaign are requested to coordinate with FSS to share the information among partners and District livestock officials.
- Coordinating vaccination campaign information would help other partners.
- Increase disease control initiatives by ensuring cooperation among livestock partners.
- DLS may ensure the best services for the beneficiaries through partners initiatives.

Livestock mapping:  
Update on 5W reporting &  
Mapping for the livestock  
partners

- Updates to monthly 5Ws upcoming
  - Adding activities: **Livestock** (20 activities) and **Climate Smart Agriculture**
  - Slight formatting change – aligning with ISCG and gFSC
  - Effective **1 Feb** – starting with reporting month January of 2022

FSS 5W [guidance note](#) how to report your organization's activities on our online tracker and Excel template.

### Activity Details

Livestock Rearing  
Livestock Technologies  
Medicine, Disease Control and Prevention  
Farm Management & Livestock Shelter Kits  
Livestock Business Development Services  
Livestock Nutrition (Vitamins and Minerals)  
Environmental Risk Mitigation  
Financial Services  
Private Sector Engagement  
Livestock Policies and ICT Platforms  
Livestock Distribution  
Feed & Fodder kits  
Cash for Livestock  
Vaccine Kit for LSP Vaccinator  
Awareness on Livestock  
Vaccine Initiative: Vaccination  
Market Linkages for Input/Output Markets  
Veterinary Services  
Livestock Quarantine  
Other

# **Welcome to Presentation on Livestock Activities Under SHARIP project**

## **Practical ACTION**

# Practical Action

**Practical Action was founded in 1966 by the eminent economist  
E.F. Schumacher, author of “ Small is Beautiful”**

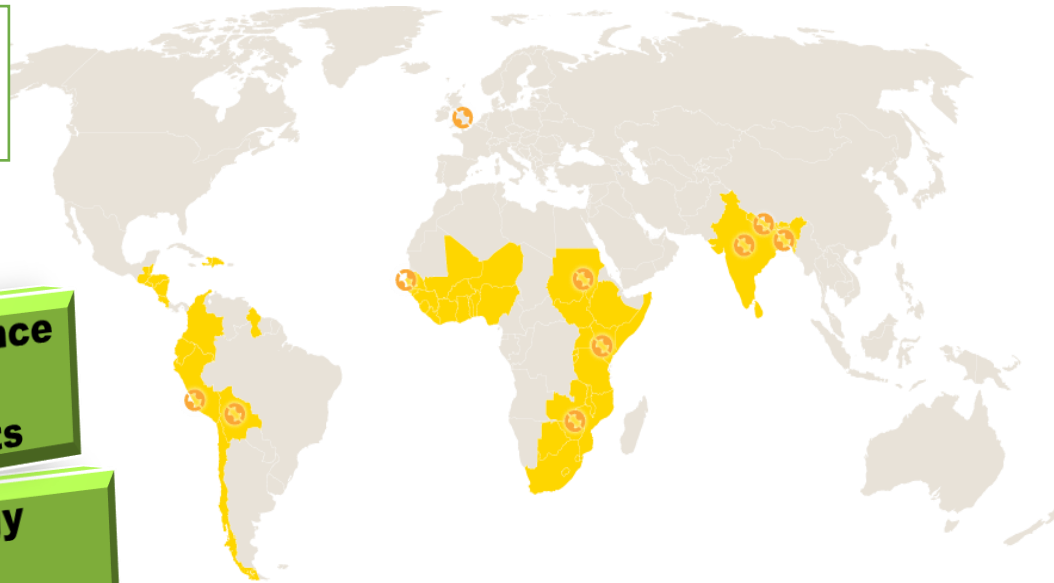

**Change Ambition**

**Farming  
that  
Works**

**Resilience  
that  
Protects**

**Cities fit  
for People**

**Energy  
that  
Transforms**

**Kenya, Zimbabwe, Senegal, Peru, Bolivia,**  
**Sudan, Nepal, India & Bangladesh**

**Practical  
ACTION**

**EMBASSY  
OF DENMARK**  
*Danida*

## **Project in Cox's Bazar**

**Project Name:** Support to Host Community Affected by Rohingya Influx Project (SHARIP)

**Focus on:** Integrated Farm Management- Farmer Field School & Agroforestry Activities (IFM-FFS)

**Funded By:** DANIDA

**Supported By:** UNDP

**Implemented By:** Practical Action

**Duration:** 4<sup>th</sup> August, 21 to 4<sup>th</sup> December, 2022

**Practical  
ACTION**

**EMBASSY  
OF DENMARK**  
*Danida*

# Covering Areas

**21.72429 &  
92.006100**

**Practical  
ACTION**

District	Cox's Bazar
No. of Upazila	3
Name of Upazila	Ramu, Ukhia & Teknaf
No. of Union	22
No. of IFM-FFS	441
Number of Beneficiaries	441*30=13230

**EMBASSY

**Practical  
ACTION**

**EMBASSY  
OF DENMARK**  
*Danida*

# **Best Practices**

- 1. Improved low cost 3 storied Poultry shed**
- 2. Improved low cost Uplifting Goat house**
- 3. Low cost / Cost free poultry egg hatching (Hazol) technology**
- 4. Regular practice of Vaccination & deworming**
- 5. Feeding practice of UMS for Beef Fattening**
- 6. Reduce mortality of Piglet**

**Practical  
ACTION**

**EMBASSY  
OF DENMARK**  
*Danida*

# Lesson Learned

**1. Collaboration among different actors on regarding aspect in FSS.**

**2. Selecting working places by gap analysis.**

**Practical  
ACTION**

**EMBASSY  
OF DENMARK**  
*Danida*

# Challenges

- 1.Regular follow up of Mass Farmers**
- 2.Deficiency of vaccine.**
- 4.Mass people are still now Unconsciousness.**
- 5.Irregular Vaccination & Deworming.**
- 6.Malpractices of CLW.**
- 7.Enforcing Veterinary Regulation & Act.**

**Practical  
ACTION**

**EMBASSY  
OF DENMARK**

**STRENGTHENING THE RESILIENCE OF COMMUNITIES TO NATURAL  
DISASTERS IN BANGLADESH**

বাংলাদেশের প্রাকৃতিক দুর্যোগে স্থানীয় জনগোষ্ঠীর সহিষ্ণুতা শক্তিশালীকরণ প্রকল্প

02 March 2022

# Basic Information of livestock activities

**Project Title: Strengthening the Resilience of Communities to Natural Disasters in Bangladesh**

**Donor: Bureau of Humanitarian Assistance (BHA)**

**Duration: 26 months (15 July 2019 - 30 September 2021)**

**Number of Beneficiary: 1660 HH**

**Intervention area: Whykong, Hnilla Unions and Teknaf Municipality (Butchers Only)**

**Work approach: Letter of agreement signing with DLS, MoU with BNF, pre and post training evaluation for trainees, Clinic agreement signing among Union Parishad Chairman, DLS and SI, Quarantine before distribution of livestock, adherence with technical SoP for the best result.**

# Activity

**Support mobile veterinary clinics establishment at Unions level: 4 veterinary agents and 2 clinic at Hnila and Whykong union**

## **Key achievements**

- Under management of DLS 2 MVC's are currently operating their service from the designated room for DLS at Hnila and Whykong union parishad complex.
- MVC's are well equipped with recommended medicines, basic supplies for treatment, stationaries, logistics supports to continue the service sustainably and effectively
- Ensured more intensive support services from DLS for herdsman living at very remote areas.
- From April to September 2021 under Whykong MVC a total of 29,418 livestock from 500 owners were treated and 690 livestock of 236 owners vaccinated, generating an income of **71,993 BDT (about USD 840)**. And the Hnila MVC 21,429 livestock from 368 owners were treated, and 1,150 livestock from wners were vaccinated, generating an income of **66,029 BDT (about USD 770)**

# Learnings

- Agents para-vet training plan was for 3 months duration which was replaced by 1 month as DYD was strictly following the Govt. order due to COVID-19.
- To compensate this gap SI also modify the plan and added 4 more 2-day long Internship session at DLS office to optimize their learning by practical session.
- Office management is very new and standard practices for documentation also identified difficult by the agents, as adaptation method SI planned for long term practical session to feel them more comfortable and become efficient but this was also reduced for pandemic so they will need more attention from DLS but busy schedule and multidimensional involvement of DLS personnel may also affect the agents best performance.
- At least 2-3 year intensive monitoring by the implementing organization help livelihood BNF to make the practices more sustainable and productive but in practical pandemic turns the projects implementation time from 26 months to 12 months!
- Medicines for clinic should be need based but donors legislation made this to focus on specific producer due to security reason, so further understanding and solution is inevitable to make such type of initiative more effective and to response the need.

# Activity

**Awareness session on livestock diseases- 480 participants by 16 sessions and support to Women animal health volunteers- 16**

## **Key achievements**

- By the technical support of DLS 480 participants (441 females and 39 male received this training.
- They received a handbook that encompasses different basic issues on identifiable characters of productive goat, cow and poultry breed,
- How feed and shelter management can be effective and based on the available natural resources to manage disease through handy training materials and practical session.
- Vaccination schedule
- Symptoms, preventive measures and treatments of common and area specific diseases of livestock.

# Learnings

- Awareness session on livestock diseases was pilot to find the effectiveness and replicability of such activity as except the training BNF did not receive any livestock rearing materials but the participants opined and suggested to increase the target as they found some issues and practice make them to believe that the nature based feed management technique was very appropriate for poor like them and only practicable awareness can reduce the livestock management cost and can bring 2-3 times more profit without any additional cost.
- WAHV found that as they are very new in such profession so they were not enough confident to earn handsome amount every month and only for providing good suggestion farmers are not used to pay. So to ensure regular income SI will consider to provide the 3 months long para-vet training which will be helpful for them to continue with this service

# Activity

**Supporting butchers to improve sanitation of slaughter practices- 20 BNF and – Sensitization sessions on good Food Hygiene- 840 – BNF Teknaf Municipality**

## **Key Achievements**

- 20 BNF received technical training on basic hygiene during slaughtering and meat preparation to reduce the risk of Zoonotic disease.
- Participants also received the kits package suggested by ULO and BNF consisting of around 40-50 various items.
- 3 slaughtering places were upgraded as they could get the proper place to use the knowledge,
- 4 persons received modified meat preparation table and 1 person received modified van to ensure their learning during meat preparation also.
- 840 participants attended in the sensitization sessions on good Food Hygiene by the expertise support by DLS and through the dissemination of printed learning materials like leaflets and posters on animal slaughter and the food safety process. A total of 840 participants (Female- 273 and Male- 567) from both the seller and consumer community awareness sessions were engaged in foods processes .

# Learnings

- Due to the very exceptional type of activity both the DLS and BNF appraise this initiative. Initially it was unusual practices but DLS role was very cooperative to successfully accomplish this work with butchers. Availability of suitable and specific learning materials was challenging earlier but stakeholders suggestion and support helped SI to accomplish this work remarkably.
- Like the works with butchers the “Sensitization session on good food hygiene” was also very unique in its type. The participants were also not sure about their intangible value of return as they never participated and had not earlier knowledge about the output but after participation they expressed their gratitude to SI for such a demanding and effective life savings arrangements which is very easy to follow if they have knowledge, mental setup to change behavior to practice the new knowledge and awareness.

**SI WILL BE HAPPY TO SHARE THE DETAIL TECHNICAL AND RELEVANT ASSISTANCE IF ANY ORGANIZATION ARE INTERESTED TO IMPLEMENT OR FOR KNOWLEDGE DEVELOPMENT.**

# Activity

**Provision of livestock kits: 300 HHs**

## **Key Achievements**

- 300 BNF (225- Goat rearing, 60- Native chicken rearing, 15- Turkey rearing)
- Beneficiaries received technical training on the specific livestock and poultry and basic business management training to manage the livestock as the source of additional income and to make business profitable for long term.
- 2 goats, 10 native chicken and 11 turkey were distributed among the respective BNF accompanied by rearing materials, feed, and vitamins.

# Learnings

- To make the livestock rearing more profitable, less expensive and as a source of continuous income and how they can increase their household socio-economic status gradually by rearing livestock and only while BNF agreed with motto of SI then they became BNF for this activity along with the other agreed criteria.
- To ensure “do no harm” SI practicing the quarantine practice from the beginning of livelihood implementation at Teknaf while all the requirements for quarantine are met only then supplier can work with SI as due to sickness of received livestock BNF’s existing livestock can be risk free.
- SI experienced some findings where rather than long term benefit BNF are more interested to get the output very shortly and the possible reasons identified the lack of ownership of BNF, no involvement with the procurement of livestock, misunderstanding and lack of determination may some reasons to reach them to the purpose of activity.
- SI technically agreed to increase the involvement or participation during the procurement process as they can reach the poverty free status.
- The quarantine will be practiced at BNF house which will help them to learn and motivate others to practice the quarantine.
