

Zimbabwe: Monthly FS Response Dashboard - Food Assistance

March 2023

The ZIMVAC report of 2022 projected that 3.8 million individuals shall be food insecure at the height of the lean season (January to March 2023). Government and development partners have collaborated to cover 100% of the food-insecure population, and successfully completed the lean season assistance by the 31st of March. While the government has covered the bulk of the caseload, this report reflects only the contribution of the food security cluster members.

Collectively, in March 2023, FSLC partners reported delivery of food assistance to 171,000 individuals (including refugees) through both cash-based transfers and in-kind interventions. The average value of the cash transfer per person was US\$12 and enabled vulnerable urban and rural households to supplement their food requirements in December. The basic food basket for in-kind interventions had cereals, pulses, oil and corn-soya blend where nutritional interventions were necessary.

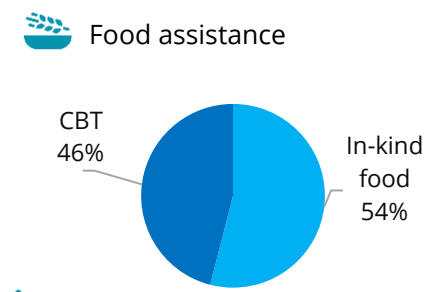

COUNTRY RESPONSE MAP

of beneficiaries
Food assistance
 <10,000
 10,001 - 30,000
 30,001 - 50,000
 >70,000
