

The Emergency Strategy Sub-Unit

Reaching The Farthest Together

Strategy, Transitions and Quality

Intro: The Emergency Strategy Unit

Welcome to the WFP GFD+ Strategy (*EU Strategy sub-unit*)

key areas of interest are:

1. Contextual analysis, forward thinking and strategy development
2. **Transitions such as towards, early recovery, development and durable solutions including GFD+**
3. Quality and improvement of Field Office and CP service delivery

Transitions: General Food Distribution Plus (GFD+)

GFD+ is the classic WFP lifesaving humanitarian work that is looking towards promoting early recovery. Aiming to **strengthen the capacity of beneficiaries to cope, recover from, and build resilience to recurrent shocks**; promote **livelihoods and income-generating activities**

So, while we give our general food ration our sub unit, field teams and CPs engage communities in planning sessions to understand what additional resilience benefits they need and what can be provided, which are provided unconditionally.

GFD+ is now the normative form of WFP emergency food assistance in South Sudan. Value-added solutions may be offered to **any GFD beneficiary**, including IDPs, refugees, returnees, resident and host communities, and other crisis-affected people, at any location where GFD programmes are being conducted

Transitions: General Food Distribution Plus (GFD+)

Examples of GFD+ interventions are:

- Livelihood support, such as seeds, tools and training
- Community infrastructure creation/renovation
- Protection and GBV trainings and support
- Disaster preparedness and DRR

The Emergency Unit Resilience Building - GFD +

Vegetable crop farming, nutrition & surplus sold

The Emergency Unit Resilience Building - GFD +

Cash crop production:
sugarcane

The Emergency Unit Resilience Building - GFD +

Skills training and tools provision

The Emergency Unit Resilience Building - GFD +

Skills training and youth empowerment

Resilience Building - GFD +
Feeder roads

Market linkages

A photograph of a rural settlement, likely a refugee camp or a makeshift village. In the foreground, there is a field of tall green grass. Behind it, a long, low structure covered in white plastic sheeting runs across the frame. In the middle ground, there are several tents made of white fabric, some with dark openings. The tents are surrounded by a dense field of green corn plants. In the background, there are several trees and a sky filled with large, dark, grey clouds, suggesting an overcast or stormy day. The overall scene depicts a temporary and possibly precarious living environment.
