WFP Flood Response Update and GFD+ activities

Value-added solutions to support resilience, response, and recovery

16 September 2020
GFD+ strategic concept

• Provision of value-added solutions that are complementary and additional to GFD emergency, life-saving food assistance
• Voluntary participation – cohort involved depends on the activity and is nominated by the community
• Community-recommended activities – bottom-up approach
• Site-specific solutions that cater to localized contexts
• Unconditional provision of value-added solutions, which may include awareness and trainings, tools, community mobilization support, asset maintenance, etc.
• Promotes outcomes in food security, health, nutrition, peacebuilding, WASH, agriculture, education, etc.
• Implemented by WFP or in collaboration with partners: CPs, other humanitarian actors, non-traditional partners, NGOs, CSOs, etc.
• One-time intervention or regular, recurrent support
Possible GFD+ solutions in flood scenarios

* This menu is non-exhaustive and simply indicative of possible GFD+ solutions. GFD+ interventions should be selected in consultation with the communities and all relevant stakeholders.
GFD+ in Practice: Panyijiar, Unity State

• Flood Impact: Livelihoods affected; farms flooded; crops destroyed; communities displaced; communal dykes breached

• GFD+ Solutions: Repair of dykes and water channels to protect individuals, homesteads, livestock, farms, and other communal assets; community engagement as porters for food delivery and protecting warehouses to ensure food safety

• GFD+ Outcomes: Disaster risk reduction; increased resilience to floods; better food and nutrition security; quicker recovery and rebuilding

• GFD+ Challenges: Displacements due to floods; implementation of Covid-19 mitigation measures
