The IASC Principals:

1. Declared the humanitarian crisis in the Central African Republic a Level-3 emergency and activated system-wide L3 response for three months.

2. Decided to appoint a senior Humanitarian Coordinator to lead the L3-response, level to be determined further to consultations, and activate the Transformative Agenda empowered leadership protocol. **Action:** The ERC to discuss the level of seniority with the SRSG by 11 December, IASC organisations to submit CVs of suitable candidates to OCHA immediately; OCHA to share candidates’ CV with IASC organisations by 12 December.

3. Welcomed the ERC’s decision to release a CERF allocation to support activities in the 100 Day Action Plan and asked to examine ways to support NGO activities in the CAR.

4. Decided to issue common messaging on the response. These messages include the complexity of the emergency being a humanitarian, human rights and protection crisis; and the need for long-term measures to support food security and livelihoods, building government institutions and establishing existing local organisations. **Action:** IASC organisation to send their written input to the Chair of the EDG by 12 December.

5. Requested the EDG to ensure an Operational Peer Review is carried out to review the impact of the L3 accompanying measures in particular on the 100 Day Action Plan. In addition, as this is a time-limited declaration, the EDG is requested to identify what humanitarian capacity must be put in place within the next three months to enable a sustainable humanitarian response beyond the L3 activation period. **Action:** The EDG to submit an update to the IASC Principals for their 16 December meeting.

6. Asked the EDG supported by the IASC Task Team on AAP to prepare an Action Plan for Accountability to Affected People, based on best practices during the response to Typhoon Haiyan, by 16 December.
7. Reiterated the importance of ‘doing no harm’ and to avoid fuelling tensions. **Action:** All IASC organisations to monitor closely the situation on the ground, taking into account local conflict lines, in close contact with DPA, DSS, the SRSG and local partners.

8. Requested the EDG ensure that the HCT is immediately strengthened and supported to elaborate the cluster capacity and field deployments necessary to implement the humanitarian response beginning with the 100 Day Action Plan. The response should be aligned with the policing, peacekeeping and human rights activities in CAR. **Action by:** EDG, HCT and GCC by end 15 December.

9. Decided to discuss the consequences of multiple L3 emergencies activated at the same time, the application of the Transformative Agenda in complex emergencies, and how to maintain effectiveness in forgotten crises which are not Level-3 emergencies. **Action:** The IASC Principals at the 17 December meeting in Geneva.
