Seasonal Inputs coverage August to September 2016

- **August**: 0% (Bari), 0% (Sanaag)
- **September**: 53% (Bari), 102% (Sanaag)

Graph showing the trend of coverage from August to September for Bari and Sanaag regions.
IASN response objective was well covered with 65% in Bari and 83% in Sanaag which marks a significant increase from August. Seasonal inputs reached 53% in Bari region and 100% in Sanaag, September being the second month of the Dyer seasonal inputs distribution. The increase in coverage is due to a mass animal vaccination done in September. Low coverage is noted in Livelihood assets.
Thank you!
