WHY DO WE NEED ONE MORE COORDINATION MEETING?

Case for South Sub-national FSS Activation
Better Coordination
8 years into the conflict needs are still very high, but resources are dwindling. Better coordination is needed to ensure resources are used efficiently.

Decentralisation from the national structure will provide more time to focus on issues specific to the South.

Increased engagement with national partners operating in the south.

Better representation in national forums and other subnational forums (AHCT).

Aligning with sector recommended response packages for a harmonized response.
Monitor the humanitarian response at the Hub level, identifying gaps and addressing them through action at a subnational level if possible, or by raising issues that require national level attention

Ensure timely, consistent and effective coordination between actors operating at the Hub level to address needs

Support the planning and implementation of assessments and analysis and priority needs, identify gaps and constraints

Monitor and review returnee trends and displacements (if any)
1. Facilitate implementation of the FSS integration strategy – which builds on the agreed harmonised package for the Livelihoods response – minimum agreed upon response package which includes technical inputs, training and FS support.

2. Better joint programming and planning.

3. Understanding what else is needed to rebuild resilience and livelihoods – what inputs are missing and how can we ensure that things are done with an environmental sustainability.
THANK YOU
