As of June 2020, 31 partners collectively assisted 268,987 people which represents about 54% increase in total achievement as compared to May which is mainly attributed to a slightly more opened humanitarian access which gave partners the opportunity to reach more affected population. Most of the beneficiaries in June were in the North-West region with about 68% while only 9% of the total beneficiaries received Agriculture & Livelihoods related support several activities like poultry, grants/loans for small businesses, farming, home gardening etc. As a means to ensure dietary diversity, partners have continued to assist the affected population in setting up micro-gardening within their home compounds to produce fresh vegetables for consumption and even sell to generate some income to the families, so far about 6,000 people have benefited from this activity.
