With a 4-year long record of below average food production in these regions, maintaining a means of livelihood has become a challenge leading to adoption of negative coping strategies by the affected population. In December, 32 FSC humanitarian actors collectively assisted 360,487 people with food security interventions, while about 30 percent of the target are still not assisted due to the limited resources. Out of the people assisted, about 93 percent of them received food assistance and only about 7 percent received Agriculture and Livelihoods related support. As part of efforts to ensure an improved coordination mechanism, the FSC is working with relevant partners to introduce mini-coordination groups in Mezam and Fako divisions (areas with high partner density) to avoid duplication and ensure the limited resources are effectively used to reach those in need.
