What is Cadre Harmonise?

- The Cadre Harmonisé (CH) is a comprehensive **analytical framework** that takes into account various indicators of **food and nutrition security** outcomes and the inference of **contributing factors**. In addition, the CH improves the understanding of concepts, enhances the process for **estimating vulnerable populations**, and strengthens the framework for synergy among local agents in different countries and at regional level for more effective food crisis management.

Why Cadre Harmonise is important?

- To estimate the population in a country affected by food and nutrition insecurity during **the lean and harvest season**
- This analysis is the **main source data** for the Food Security group in-country to estimate **People in Need (PiN)** and **Target population for the HNO and HRP** to guide the yearly response and programming

Where is Cadre Harmonise done in West Africa?

18 COUNTRIES
When is Cadre Harmonise Conducted?

- The Cadre Harmonisé (CH) is done **twice in a year in March and October**. The exact dates for the upcoming analysis in October 2020 is still being discussed by the Government and relevant humanitarian partners after which the **timeline** will be shared with all.

Cadre Harmonise in Cameroon

- In Cameroon, **4.8 million people** have been estimated to be food and nutrition insecure (April-Dec 2020) based on projections of CH with the COVID-19 impact.
- The Cadre Harmonisé (CH) in Cameroon is also in line with the standard implementation of the **global timelines** with the leadership of the Cameroon government and partnership of CILLS, FAO, WFP and all humanitarian partners.
- The analysis is done in **all 10 regions of Cameroon** mainly to estimate in phases the population vulnerable to food and nutrition insecurity.
Who should attend?

- Where possible, as many partners of the Food Security Cluster should join the National workshop where evidence-based deliberations and consensus are being made on the current and projected situation of food and nutrition situation in the various divisions and regions of Cameroon for effective classification of the situation.

- The FSC is currently planning to see that at least 2 partners from the field (NWSW) are present in the upcoming CH workshop to ensure that first-hand matters of issue are brought to the discussion and taken into consideration.

ASSESSMENT REGISTRY

- Since the CH analysis takes into consideration contributing factors, it is important that partners also provide inputs to this very important analysis by sharing any form of assessment/monitoring that may have been conducted by their organization during the analysis year which will help during the discussions at the workshop.

- An assessment registry matrix will be shared by the FSC to help gather as much information on the available assessments within the cluster to support the CH analysis in October 2020.
As of July 2020, 29 partners collectively assisted 269,179 people out of which about 90% of the total beneficiaries received food assistance either through in-kind or cash/voucher modality, in addition to the standard food items being distributed some partners (ASWEDO, CAFEDO, HOA etc.) have also included hygiene kits and face masks as part of their relief items. Most of the beneficiaries in July were in the North-West region with about 69% while only 10% of the total beneficiaries received Agriculture & Livelihoods related support several activities like trainings, poultry, grants/loans for small businesses, farming, home gardening etc. So far, about 860 persons have received different types of trainings ranging from business skills acquisition, farming practices, livestock production out of which some 40 unemployed youths were trained by SUDAHSER on agro-pastoral activities in Bamenda 3 sub-division in the North-West region.
