VAlue addtion soya products

Lesson learnt

- preventive nutrition training are more effective in fighting malnutrition.
- Attitude change program have changed men to become more responsible to support their wives and even in house work
- HH are able to give rest to land: crop rotation and fallow system
- Households have learnt to prepare varieties of vegetables, "the rainbow dish," protein and micronutrient-rich complementary foods for children, and careful, hygienic food preparation.

Lesson learnt

- Household learnt having pit latrine, proper care of latrine and environmental hygiene contribute to healthy family.
- Pads distributi have increased enrolment
- Moderation in everything, self-control, faithfulness to the spouse, and total abstinence from addictive substances amount to stable family
- Household economy, saving, debt avoidance and resource management are some of the benefits, households get when they are engaged in VSLA program.
