In October, the Food Security Cluster response has continued to support existing food insecure populations in camps, off camp locations and newly displaced families. Complementing the emergency response, cluster partners are also providing livelihood support, capacity building and skills training as well as agricultural interventions across Iraq.

Active monitoring and assessments of the food security situation continue with regular price and market bulletins, partner assessments and post distribution monitoring.

Strategic discussions and consultations are ongoing with FSC partners to further inform and develop the 2018 Humanitarian Response Plan.
