The pie charts on this map represent level of achievements compared to targets set out in the Humanitarian Response Plan (HRP) 2021. The level of achievements is built up month by month starting from January 2021, and does not therefore represent the monthly result.

For districts where no activities under the HRP are reported, the pie chart is not displayed.

Note: WFP provides food assistance to additional beneficiaries who are not reported under the HRP, as that caseload was not considered within the FSC PIN (and therefore not within the FSC HRP target). In fact, the FSC PIN for rural areas was derived from the IPC, where the population in Phase 3+ was estimated taking into account the impact of humanitarian assistance - hence it represents only those who are in need of additional assistance.
