Non-HRP RESPONSE DASHBOARD
FOOD ASSISTANCE IN MAY 2021

Over 1.7 million people in rural and urban areas of Mozambique face high levels of acute food insecurity at the peak of the April to September 2021, all previous districts remained in Crisis (IPC Phase 3). The key drivers of the food insecurity are conflict (northern); residual effects of the cyclones (northern and central); floods (northern and central); and droughts (southern and central); exacerbated by Covid-19 pandemic.

Recently, in 23 January 2021, Tropical Cyclone Eloise made landfall 20km south of Beira city. Sofala province as a category 2 Tropical Cyclone where households foods stock, livelihoods were loss, the markets disrupted and prices of basic commodities increased. Over 261,000 hectares were damaged ahead of the harvest season and over 458,000 people in Sofala and Manica are estimated to be Crisis levels of food insecurity (IPC Phase 3).

In addition, a third consecutive drought hit southern parts of the country resulting in failure in the main cropping season (2020/21).

Zambezia province is receiving IDPs coming from Palma district in Cabo Delgado. The simultaneous and consecutive shocks have left vulnerable affected populations with limited options of coping.

9,500 refugees and asylum seekers in Maratane Refugee Camp (Nampula) are being assisted with food assistance, and strengthen income generation opportunities through livelihoods project in close collaboration with the Government of Mozambique and other UN agencies.

The priorities of Food Security Cluster is to provide lifesaving food assistance to vulnerable populations experiencing severe food insecurity and help restore livelihoods to shock affected people. During the month of April the Food Security Cluster partners assisted more than 115,650 to acutely food insecurity population in the entire country. The assistance is not within the HRP.
