Cluster Obj 2: Livelihood Seasonal Inputs: (Agriculture and Livestock), as of August 2020 Deyr season

For the responses provided in August, IRW contributed 66%, NAPAD 15%, PENHA 14%, CoDHnet 3%, and SIF 2%.

August being the first month for Deyr season, there is no cumulative value in this report showing the number of people assisted. As of end of August, the number of people reached accounts for 2% of the seasonal target (1,060,406).

Thus partners need to scale up for the coming months.

During the month of August under Objective 2 (Livelihood Seasonal Inputs on Agriculture and Livestock), FSC partners assisted 26,030 beneficiaries with seasonal inputs and livestock asset protection related responses.
