Cluster Obj 2: Livelihood Seasonal Inputs: Agriculture and Livestock), as of January 2020 (Deyr Season)

RESPONSE BY MODALITY

- Livelihood inputs – In-kind (Agriculture and Livestock)
  - 62% Cash
  - 38% Voucher
  - USD 60,000 Cash/Vouchers Transferred

PEOPLE TARGETED

- 2.5 Million
- 50% men
- 50% women

PARTNERS REPORTING

- 2 partners

The map represents cumulative support for the period August to January 2020.

Strategic objective 2 update

- Monthly response trend: Beneficiaries assisted

During the month of January, FSC partners assisted 5,793 beneficiaries with seasonal inputs in both Awdal and Woqooyi Galbeed regions. Cumulatively, for the 2019 Deyr season, 2,329,972 people have been reached: representing 92% of target (2,529,069). For the responses provided during the month, PENHA contributed 62% while SCI contributed 38%.

Desert Locusts continue to breed in Somalia, Ethiopia and Kenya. For Somalia, while the desert locust population was initially confined to rangeland/grasslands (in the north), it has since spread to districts in the south.

FAO (with financial support from DFID) is closely working with Ministries of Agriculture and partner organizations on surveillance and control efforts. Hatching of a new generation of locusts and the formation of new swarms might even further result in substantial crop/pasture damage in the Gu season.
Livelihood Seasonal Inputs (Agriculture and Livestock) 

Gap analysis: Total Number of people targeted vs reached, Jan 2020

(XX)* - Coverage above 100%
