Livelhood inputs – In-kind (Agriculture and Livestock)

**PEOPLE TARGETED**

1.5 Million

50% men  

50% women

**PARTNERS REPORTING**

4 partners

During the month of March, FSC partners assisted 99,204 beneficiaries with seasonal inputs. For the responses provided in March, Mercy corps contributed 50%, Relief International 42%, while AAH and WVI provided 5% and 3% respectively. Cumulatively, starting February, a total 143,202 beneficiaries have been assisted with farm inputs and land preparation and some 6,000 beneficiaries with animal restocking (shoats). As of end of March, the number of people reached accounts for 9% of the seasonal target.

Desert Locusts continue to breed in Somalia, Ethiopia and Kenya. FAO (with financial support from DFID) is closely working with Ministries of Agriculture and partner organizations on surveillance and control efforts. Hatching of a new generation of locusts and the formation of new swarms might even further result in substantial crop /pasture damage in the Gu season.
