Though COVID-19 pandemic is affecting many sectors, there is need to scale up these activities which include repairing and effectively managing small-scale productive infrastructure to mitigate shocks, life skills training activities and mitigating other threats to food security including Fall Armyworm and locust inversion being experienced in various parts of Somalia. On line training tools could be used to train farmers on how to control Fall Armyworm through pull and push method.

FSC partners reached **177,919** beneficiaries (or 12%) compared to a target of **1,455,102**. This achievement is less than last month’s coverage where 14% of the target was reached.
