FSC Monthly Response Update
AOB
- HRP Light revision
A combination of riverine, flash floods, cyclone and stormy weather aggravated existing food insecurity situation in Somalia.

Twenty-nine (29) partners contributed to multiple food security assistance during calendar month of May 2018.

Food assistance (cash and in-kind) combined with livelihood support ("Cash+" and conditional transfers) have ensured immediate access to food for the beneficiaries reached.

The seasonal input and livestock assets protection support complemented access to food support.
## FSC RESPONSE LEVEL IN ALL REGIONS (ACTUALS –VS- TARGET)

The Contagious Caprine Pleuropneumonia (CCPP) vaccination was the main assistance of the month to protect the livestock assets from contagious diseases.

FAO have contributed the highest share of the beneficiaries assisted in May (99%) and the remaining one percent (1%) was contributed by NAPAD and ADO. 1,576,481 beneficiaries have been supported since the beginning of the GU Season February to date.

Vaccination/animal treatment, agricultural input (seed and tools distribution) and irrigation and tillage support constitute the bulk of the responses so far. The FSC has reached 55% of the seasonal target (i.e. 2,879,257) in this objective.
FSC partners have also continued their conditional assistance in May reaching 106,984 people out of the 1,354,324-targeted beneficiaries (accounting 8% of the target) this is a one percent reduction from last month’s 9% coverage.

Under this objective, CARE provided 17% of the responses, ACF 16%, WVI 14% and WFP 13%. Combined, twelve (12) partners delivered assistance to the remaining 40 % of the beneficiaries.

The magnitude and severity of the existing food insecurity is being further aggravated by the prevailing river/flash flooding and cyclone and stormy weather.

This will put another strain on the limited humanitarian resources unless additional resources mobilized to respond to both the immediate food and livelihoods needs of the affected population.

Insecurity, especially in part of lower Shebelle, Bay, Bakool, middle Juba, Banadir regions have hindered humanitarian access to the most vulnerable populations. The flooding also aggravated the access challenges due to damaged roads.
