- ❖ Approximately 87,696 beneficiaries received assistance based on this objective.
- ❖ This 3% of the seasonal target i.e. 2,879,257 targeted for the season.
- ❖ In February partners focused primarily on agricultural input (seed distribution and irrigation support).
- ❖ Since this is the beginning of the response cycle for seasonal input and livestock assets protection assistance for the GU we expect a gradual increase as the season progresses.
- ❖ FAO have contributed the highest share of the beneficiaries assisted in this month (75%) followed RI (25%). Qatar Charity has also assisted some of the beneficiaries in restocking and providing tailoring kits

- ❖ **The down-ward spiral of IASN response over the last four months particularly in Woqooyi Galbeed, lower Shabelle and Awdal regions where acute food insecurity has either sustained or deteriorated. The response in these regions has not only reduced as compared to last month but significantly lower than the target of the month (less than 18-30% of the target)**

- ❖ **Insecurity, especially in part of lower Shebelle, Bay, Bakool, middle Juba, Banadir regions have hindered humanitarian access to the most vulnerable populations. As a result of prolonged periods of poor access to certain districts in these regions, vulnerable households failed to get much needed assistance.**
