CO2. IMPROVE FOOD SECURITY STATUS THROUGH PROVISION OF AGRICULTURE ASSISTANCE

FSLC partners collectively supported 2,039 individuals (14% achievement). Cash and voucher account for 81% of the response modality in the first quarter of 2020 followed by training 10%, and livestock feeding 8%. Agricultural input, land preparation support, seeds, and tools accounts for 1% of the total modality. There is a need to significantly increase agriculture inputs to support production.

The need for agricultural assistance remains high along the ‘contact line’ most especially considering the existing condition with mine contamination of fields, water shortages, and unstable irrigation. The following partners contributed to objective 2: NRC (56.3%), PAH (30.1%), and PiN (13.7%).
