

CO1. ENSURE IMMEDIATE ACCESS TO FOOD

The partners collectively reached **15,755** (or 14%) people in June out of 109,721 people targeted. The FLSC changed its target based on the revised 2020 HRP, which includes the COVID-19 target. The June achievement is 93% higher than the previous month when 8,162 were assisted. **25,959** people (24% of the target) have been assisted by the partners under CO1 in the second quarter of 2020.

The organisations that contributed to the response are: Proliska (28%), Caritas (22%), ASB (16%), ACTED (6%), Emmanuel (5%), TGH (2%), PAH (1%), DRC (1%). Partners operating in NGCA contributed 18% of the food assistance in June and their response slightly decreased compared to the previous month by 3%. In-kind assistance accounts for 64%, followed by cash modality (23%) and vouchers for food (13%).

Despite the number of people reached in June, the response gap is still significant. The lack of access to NGCA, funding, and quarantine restriction are the primary challenges encountered by the partners in June.

PEOPLE ASSISTED BY REGION
