FSL Cluster Meeting, Juba, South Sudan
22nd July, 2020:

Five Ways to Protect Yourself from Coronavirus:

1. Wash hands regularly with soap and water.
2. Do not shake hands.
3. Avoid close contact with anyone.
4. Cover your mouth and nose with tissue or cough and sneeze into your flexed elbow.
5. Stay at home and avoid travel when you have flu-like symptoms.

For more information, call the Ministry of Health South Sudan through toll-free number 6666.

NAWG Hotspots - Panyijar

Context:
- First large-scale flooding of 2020 from Monday 22 June onwards
- Affected areas (REACH focus group discussions): Greater Nyal, Greater Ganyliel (Tiap payam), Panyijar

Displacement/Population Movement:
- Reports: 45,000 households affected (likely too high), population displaced to higher ground, approx. 600 livestock submerged
- Not enough shelters for IDPs

Impact:
- Infrastructure damaged (dykes, roads, up to half of shelters)
- Reduced access to services (health services, markets)
- Reduced access to food (crops destroyed, limited access to grazing land)
- WASH infrastructure submerged

Priority Needs:
- NFIs (carried away by flooding): plastic sheets, mosquito nets, cooking sets, buckets, fishing kits, survival kits
- Food assistance
- WASH

Way Forward:
- Rapid inter-agency assessment this week
Movlo-Kulu Boma

- Inter-communal violence related revenge attack. Reportedly on 23 May youth from Dinka Atuot killed a young man between Dulo and Kokori,
- Fighting between Kokori and Dinka Atuot youth started on 1 June causing displacement of 6,804 individuals (1,801HH) from Bar Bol (2,700ind.), Dulo (1,698ind.) and Kokori (2,406ind.) to Kulu payam. 57% of IDPs are female, 43% male and 48% under 18 years old. **Food, protection, sanitation and health** reported as urgent needs
Desert Locust Update

• A swarm of desert locusts suspected to be migrating from Kabong in Uganda arrived in Kapoeta South County, moving steadily in one direction towards North-East of Kapoeta East and ultimately towards some parts of Kapoeta North.
• The desert locusts did not land as they overflew the area.
• The swarm of desert locusts is likely to land in Kapoeta East and the far North of Kapoeta North.
• FAO in collaboration with the State Ministry of Agriculture has dispatched a team to the locations where the desert locusts were sighted and will provide an update on their location as well as control measures to be undertaken urgently.
