FSL Cluster Sectoral Analysis Classification for the HNO 2022

HRP 2022 Cluster Overview:

In 2022, the Food Security and Livelihood Cluster aims to provide food assistance to prevent famine and improve food consumption, dietary diversity and coping strategies for vulnerable populations facing IPC phases 3, 4 and 5. The cluster will enhance and sustain emergency food production through complementary vegetable and crop livelihood inputs, fishing, and livestock support. Dependency on food and agricultural inputs will be reduced to support and strengthen households' ability to absorb shocks in collaboration with other clusters and development partners through the building of assets, capacity, and accessing basic services and social safety nets. Each of the cluster's objectives will be implemented in a way to prevent the spread and transmission of COVID-19, and work towards strengthening the nexus between humanitarian response, peacebuilding and resilience, and development programming.

In 2022, the FSL Cluster will target 6 million people, an increase of 300,000 people from 2021, and will provide humanitarian life-saving assistance to 4.6 million South Sudanese people, in line with its objectives.

The FSL Cluster and partners will use either in-kind assistance, cash-based transfers (CBT), or a combination of both. The modality is determined by the principles of feasibility, effectiveness, efficiency, economy, and safety.

The FSL Cluster continues to increase community engagement, including AAP, disability needs, the needs of different sex and age groups, community feedback and complaint response mechanisms.
