**SOUTH SUDAN FOOD SECURITY & LIVELIHOODS CLUSTER**  
Strengthening Humanitarian Response

## FSL Cluster County Prioritization 2023

## HRP 2023 Cluster Overview:

In 2023, the Food Security and Livelihood (FSL) Cluster aims to provide emergency food assistance to prevent famine and to improve food consumption, dietary diversity and coping strategies for the vulnerable people facing IPC phases 3, 4 and 5. The cluster aims to enhance and sustain emergency food production through complementary vegetable and crop livelihood, fishing and livestock support. The cluster aims to reduce dependency on food and agricultural inputs to strengthen the households' ability to absorb shocks and to adapt to a changing context, especially in relation to climatic change, economic- and conflict-related risks.

The FSL Cluster's life-saving humanitarian response is supported by resilience and development partners through assets and capacity-building, support for better access to basic services and social safety nets. Each of the cluster's objectives will be implemented to strengthen the nexus between peacebuilding, humanitarian response, resilience (disaster risk reduction) and development programming.

The FSL Cluster and partners will use either in-kind assistance, cash-based transfers (CBT), or a combination of both. The modality will be determined by the principles of feasibility, effectiveness, efficiency, economy and safety. The FSL Cluster continues to increase community engagement, including AAP, disability needs, the needs of different sex and age groups, community feedback and complaint response mechanisms.
