Data sources:
Food Security Sector (FSS), FAO, WFP, Palestinian Central Bureau of Statistics (PCBS)

Disclaimer:
The boundaries and names and the designations used on this map do not imply official endorsement or acceptance by the United Nations.

Additional explanations:
Figures related to programme response are planned and not achievements. The response results depend on funding levels. Response figures were collected by the FSS during the HRP process at the end of 2017. Food insecurity and resilience data are drawn from the SEF/SEC survey 2014. Population figures are based on projections of PCBS for 2016. Food assistance includes food in-kind and e-voucher modalities.

Map legend classes are calculated on Palestine overall (West Bank and Gaza Strip). Therefore not all classes may appear on each map. The grey circles in the legend refer to the size of the coloured pie charts in the respective map.

Please turn over for more details on activities and implementing partners in the Gaza Strip.
How to use this matrix:
The matrix is meant as a tool to improve coordination among organizations working in food security in Palestine. Each table represents one governorate. For every governorate it is shown which partners (rows) are active in which working field/activity type (columns). Thus, each organisation can quickly look up which other organisations are active in the same field in the same governorate. The numbers indicate the amount of projects per partner in the working field in the respective governorate.

Additional explanations:
Data used in this paper were collected by the FSS in parallel to the HRP process at the end of 2017. It was directly submitted by the partners. All projects are planned projects, while actual implementation depends on funding levels. Please turn around for more information on food security and socio-economic background data, as well as budget and beneficiary distribution. Food Assistance includes food in kind and and e-vouchers modalities.
