35% People of Cox's Bazar are living under moderate to high level of Chronic Food Insecurity and classified as IPC level 3+

SITUATION OVERVIEW

Cyclone Mocha made landfall in Bangladesh on the evening of 14 May 2023, leaving considerable damage in its path. The Ministry of Disaster Management and Relief (MoDMR) estimated that a total of 4 districts, 26 Upazilas (sub-districts), 99 unions, and 429,337 Bangladeshi nationals were affected by Cyclone Mocha. In Cox's Bazar alone, 334,620 people from 60 unions of Chakoria, Kutubdia, Moheskhal, Pekua, Ramu Sadar, Teknaf and Ukhiya Upazilas were affected, more than two million people were evacuated to cyclone shelters and 12,469 houses were damaged.

FAO and WFP as Food Security Sector (FSS) co-lead agencies, undertook 2 separate rapid assessments to estimate the Food Security situation including damage and loss in the agricultural sector and needs of the affected Bangladeshi and Rohingya communities in Cox's Bazar.

METHODOLOGY

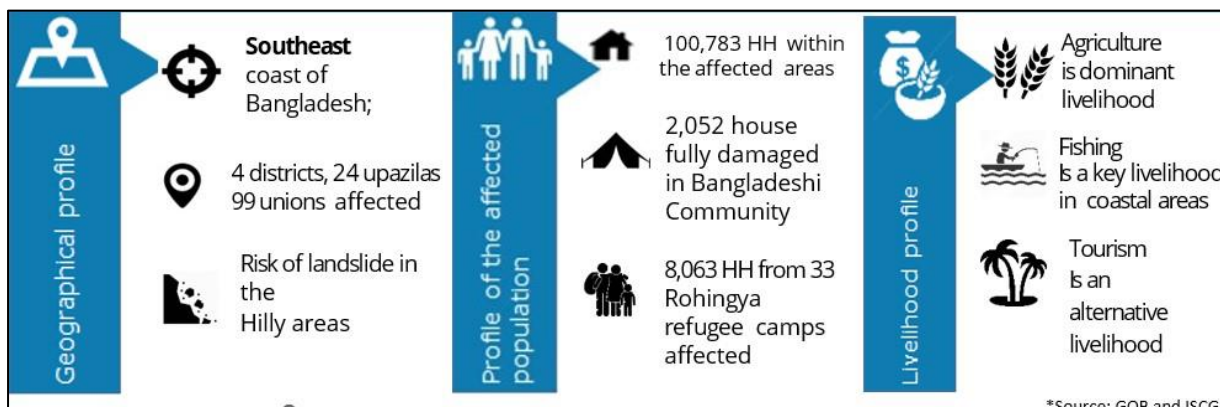

FAO and WFP, in close coordination with the Food Security Sector/Food Security Cluster (FSC), designed two rapid needs assessment questionnaires for Key Informant Interviews (KII). The sampling followed a snowball approach, starting from Upazila-level respondents, followed by purposive sampling of union-level representatives as per identification of damage and loss pockets. Data was collected using Kobo, both in-person and phone interviews with representatives from the Department of Agricultural Extension (DAE), Department of Livestock Services (DLS), Department of Fisheries (DoF), Forest Division (FD), Disaster Management Committees (DMCs), and traders from the Upazila and the Union levels across Cox's Bazar. Shushilan conducted a Rapid Assessment after the immediate onset of the Cyclone MOCHA in Sabrang and St. Martin unions.

FSS with the support from FSC has compiled 2 assessments complemented by the Shushilan rapid assessment and Faith in Action rapid assessment.

KEY HIGHLIGHTS - FAO

 <p>Cyclone with landslide Landfall: 14 May 2023 Damaged houses: 12k [CXB] Individuals: 0.3m Bangladeshi [CXB]</p>	 <p>Crop Damage: 346 Ha cropland, stored crop & infrastructure (\$1m) Affected HHs: 3.5k</p>
 <p>Affected area Most affected: Teknaf & Moheskhal Most affected unions: 25</p>	 <p>Livestock Loss: 3.3k poultry, 28 goats & 15 cattle (\$17k) Disease and destocking</p>
 <p>Market functionality Sales & transport difficulties Temporary input unavailability Commodity & input price hike</p>	 <p>Fishery Damage: enclosures, boat & net (\$307k) Drop in catch & next 65-day ban</p>
 <p>Food security Stored food loss Access difficulties, temporary shortage</p>	 <p>Forestry Damage: 32 ha forest, plantation & nursery (\$18.5k)</p>

WFP

SHUSHILAN:

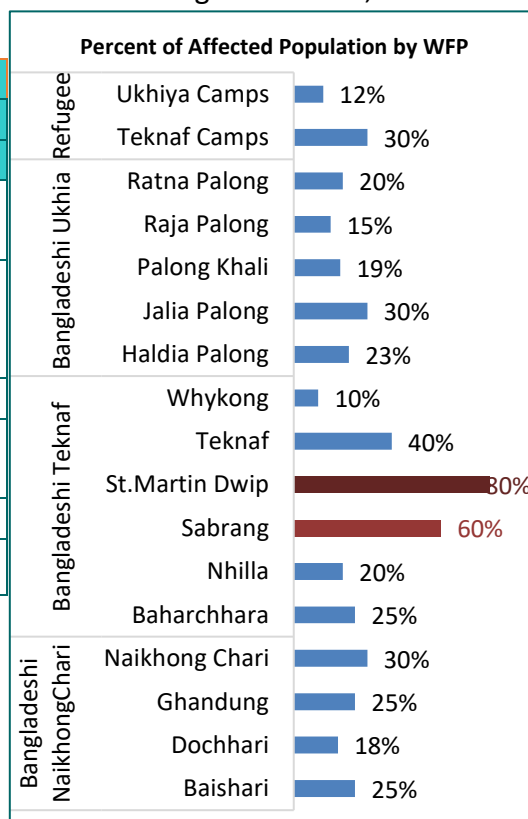

Short Term	Mid-Term/Long-Term
<ul style="list-style-type: none"> Agricultural inputs and supporting materials, e.g., seeds, bamboo, rope, fertilizer, net, etc. Cash for work (CFW) Cash-based support/ Livelihood grant support 	<ul style="list-style-type: none"> Income Generating Activities (IGAs) for livelihoods Household-level micro-business development. Technical inputs

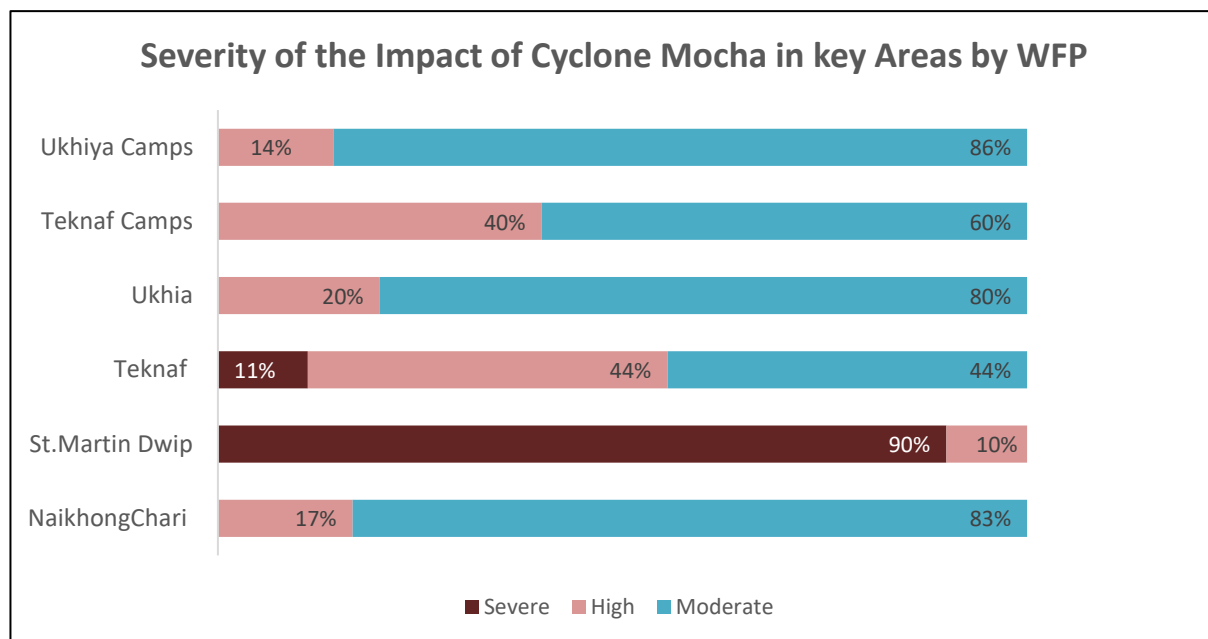

DAMAGE AND LOSS

IMPACT ON POPULATION AND INFRASTRUCTURE

The most affected producer groups were found to be small and marginal farmers, sharecroppers, fish producers and fishermen.

FAO			
Affected Upazila	Affected unions	Severity of impact	
		High	Medium
Moheskhali	8	-	Matarbari, Dhalghat
Teknaf	6	Sabrang, St. Martin	Baharchhara, Nhilla, Whykong
Chakoria	5	-	-
Cox's Bazar Sadar	2	-	-
Ukhiya	3	-	-
Pekua	1	-	-

CROPS

Area	Name of crop	Affected farmers (HH)	Affected crop land areas			Production loss (MT)	Total loss (USD)
			Fully damaged (ha)	Partially damaged (ha)	Total (ha)		
Teknaf Upazila	Summer vegetable	2,420	10	150	160	1,603	721,440
	Betel leaf	1,030	40	140	180	744	371,720
	Sub-Total	3,450	50	290	340	2,347	1,093,160
Moheshkhali Upazila	Summer vegetable	30	0	3	3	75	33,750
	Betel leaf	40	0	4	4	35	17,500
	Sub-Total	70	0	6	6	110	51,250
Cox's Bazar District Total		3,520	50	296	346	2,457	1,144,410

LIVESTOCK

Area	Dead cattle (#)	Dead goat (#)	Dead poultry (#)	Livestock loss (TLU ¹)	Total loss (USD)
Teknaf Upazila	13	28	3,370	43	16,118
Ukhiya Upazila	2	0	0	1	1,500
Cox's Bazar District	15	28	3,370	44	17,618

FISHERY

Area	Damaged forest (ha)	Damaged plantation (ha)	Damaged nursery (ha)	Total loss (USD)
Moheshkhali Upazila	14	11	4	15,000
Teknaf Upazila	2	1	0	3,500
Cox's Bazar District	16	12	4	18,500

¹ Tropical Livestock Unit (TLU) conversion factors: cattle = 0.5, goats = 0.1, pigs = 0.2, and chicken = 0.01

FOOD SECURITY SITUATION

According to FAO KII, High to Moderate loss of stored food occurred in Teknaf, Moheshkhali and Kutubdia (Figure 8). Eighty-six percent of the respondents from Teknaf reported challenges in accessing food, while 25 percent from Moheshkhali mentioning the same. All respondents from Teknaf reported not having access to sufficient food.

FOOD INSECURITY PERCEPTION IN THE COMING 3 MONTHS according to WFP

WFP KII	Bangladeshi	Rohingya	Saint Martin
Food access problems may have in the coming months (% of the population)	40%	80%	60%
Foreseen causes for food availability degradation?	Price hikes, crop damage, income opportunities reduced, cyclone & rainy season, etc.	Ration cut, rainy season, limited livelihood, etc.	End of the tourist season, fewer income opportunities, and rainy season

MARKET SITUATION

High to medium levels of market disruptions (73 and 55 percent), sales difficulties of agro-commodities (80 and 13 percent), and higher requests for credit purchases are reported in Teknaf and Moheshkhali Upazilas. Unusually lower sales were observed in Teknaf², Moheshkhali, Pekua, and Cox's Bazar Sadar. Respondents from Teknaf (57 percent) and Moheshkhali (18 percent) reported that current stocks of agro-inputs are likely to last less than a week as supply shortfalls is being observed due to transportation difficulties. Relatively less available products include seeds/seedlings, farming tools/equipment/machineries, fertilizers/hormones/pesticides, livestock feed, and livestock equipment. Moderate to sharp increase of commodity prices were found in Teknaf, Moheshkhali and Kutubdia. There were reports of labor shortages and higher operating costs, and in some remote locations of Teknaf, shop damages, power-cuts and around 5 percent price increase of rice. Most respondents forecasted that the markets will resume full functionality within 10 days and suppliers will be able to replenish stocks within a week from placing their orders.

NEEDS AND PRIORITIES

Sector	Priority 1	Priority 2	Priority 3	Priority 4
Crop	Tools & equipment	Seeds ³	Cash	Fertilizer
Livestock	Livestock feed	Shed renovation	Training	Cash
Fisheries	Fishing tools ⁴	Training	Fish Feed	Cash
Forestry	Seedlings	Planting materials	Maintenance support	

² also reported a lower number of clients

³ Preferred seed variety: Eggplant, Bottle gourd, Cucumber, Okra, Bitter gourd, Pumpkin, Ridge gourd, Tomato

⁴ Urgent tool/equipment needs: Fishing net, life jacket, torch light and fishing hook

Top three priority needs (Bangladeshi)

1. FOOD/CASH for FOOD
2. SHELTER
3. SANITATION

Top three priority needs (Rohingya)

1. SHELTER
2. FOOD
3. SANITATION/CLOTHING

LIMITATIONS

Due to the urgency of the situation, the assessment had to be conducted within a limited timeframe, which posed challenges in reaching all the affected areas and capturing the views and experiences of every affected individual. As a result, there may be gaps in fully understanding the extent of suffering and obtaining a comprehensive representation of the affected population.

Additionally, it is important to note that Key Informant Interviews (KIIs) have inherent limitations. The information gathered through KIIs relies on the perspectives and experiences of the informants, which may vary and be subject to biases or inaccuracies. There is always a possibility of information being exaggerated or understated, depending on the informants' perspectives or other factors.

Therefore, it is crucial to exercise caution when interpreting and utilizing the results of the assessment. The findings should be considered as indicative rather than absolute, and other sources of information should be considered to obtain a more comprehensive and nuanced understanding of the situation.
