MAINSTREAMING ACCOUNTABILITY TO AFFECTED POPULATION AND CORE PEOPLE-RELATED ISSUES IN THE HUMANITARIAN PROGRAMME CYCLE THROUGH THE CLUSTER SYSTEM
ACKNOWLEDGEMENTS

The Programme Quality Working Group of the gFSC, and particularly the partner agencies noted below, supported and provided technical expertise in the development of the original checklist. HelpAge International and the GNC worked with the gFSC and its partners to update the document and gained an endorsement of the GNC Strategic Advisory Group and the GNC partners.

GUIDANCE FOR MAINSTREAMING ACCOUNTABILITY TO AFFECTED PEOPLE-RELATED ISSUES IN THE HUMANITARIAN PROGRAMME CYCLE THROUGH THE CLUSTER SYSTEM

This guidance is an updated version of the original "Checklist to mainstream people centric issues in the Humanitarian Programme Cycle", produced by the gFSC. All photos belong to UNICEF.
The principal objective of international humanitarian action, and the purpose of coordination, is to meet the needs of affected people by means that are reliable, effective, inclusive, and respect humanitarian principles.

The global Food Security Cluster (gFSC) developed the original “Checklist to mainstream people centric issues in the Humanitarian Programme Cycle”, building on experience from country operations in countries such as Afghanistan, Pakistan, Philippines, South Sudan and Somalia during 2012-2014. The purpose of the checklist was to guide cluster coordination teams and their partners on the integration of four core people-related issues; age, disability, gender and protection, with the aim of improving accountability to affected populations (AAP) in a more holistic way. The guidance has been reviewed and updated to ensure relevance to both food security and nutrition actors, as part of a joint agreement between the gFSC and the Global Nutrition Cluster (GNC) to scale up efforts to meet collective commitments on AAP. Communication with communities (CwC) has been added as an additional core theme.

This guidance aims to support national clusters to implement their commitments on AAP and core people-related issues both before the beginning of a response (preparedness) and thereafter, through the humanitarian programme cycle (HPC). The HPC phases are: Core, industry resources are available to assist in understanding AAP in more detail and in taking these commitments to a higher level of implementation, for example, the Core Humanitarian Standards (CHS) and its guidance document, the IASC tools for implementation of the five commitments on AAP, the Nutrition Cluster Operational Framework on AAP, the WASH Cluster’s resources on AAP including their minimum commitments, WFP’s Brief on AAP and FAO’s Guidance Note on AAP and associated fact and resource sheets.

For each phase of the HPC, 3 key, minimum and practical steps are suggested. Links to further guidance and other concrete examples are provided for reference and many of the resources have relevance across the HPC phases. The 3 steps suggested per phase aim to alert food security and nutrition actors to some achievable, core and minimum activities they should undertake, but are by no means exhaustive.

The role of the Food Security and Nutrition Clusters includes to support, encourage and enable cluster partners to integrate core people-related issues, including gender, age, diversity and disability, as one of the six core cluster deliverables. In turn, according to their minimum commitments to the cluster, the role of partners is to ensure that these key steps are implemented throughout their programme cycle and that good practices and lessons learned are shared with the cluster.

The respective global clusters are available to provide capacity development support to assist country clusters with the practical implementation of this checklist.

PREPAREDNESS

Preparedness makes it possible to respond faster, more appropriately and efficiently, and to take decisions on the basis of more reliable information. Staff at every level are likely to respond more efficiently if training, analysis, planning, prepositioning, and information collection have been strategically managed and coordination mechanisms have been established.

KEY MINIMUM STEPS

1. Consult with available gender, protection, age, disability, CwC and accountability specialized agencies and focal points when developing the preparedness plan to seek expert input. Ensure issues are referred to in the plan.

2. Ensure Sex and Age Disaggregated Data (SADD) is routinely collected, analysed and used to set a baseline, ensuring that age-related data is nuanced according to accepted practice of 10 year cohorts without an upper age limit. If primary data is not available, collect, analyse and use secondary data.

3. Coordinate capacity building on core people-related issues and AAP among partners to ensure skill within the cluster to carry out key activities throughout the HPC.

NEEDS ASSESSMENTS

Needs assessments provide the evidence base for strategic planning, as well as the baseline information upon which situation and response monitoring systems will rely. Needs assessments should be conducted continuously throughout the humanitarian programme cycle.

KEY MINIMUM STEPS

- Consult with available gender, protection, age, disability, CwC and accountability specialists and specialized agencies and focal points in the design of assessments and collection and analysis of data, to ensure that assessment tools, data collection modalities and analysis integrate core people-related issues and AAP effectively. This includes ensuring that women, men, girls and boys, including the elderly and people with disabilities are equitably represented and participate in needs assessments.

Strategic Planning

Strategic planning defines the response objectives and the key activities that need to be undertaken. Effective strategic planning considers the different groups to be targeted, differing levels and types of vulnerabilities, and distinct and different needs.

**KEY MINIMUM STEPS**

1. **Consult with available gender, protection, age, disability, CwC and accountability specialized agencies and focal points to provide inputs to the Strategic Planning (Humanitarian Response Plan, Crisis Response Plan) as possible, so that the objective, narrative, activities and indicators capture successes on core people-related issues appropriately. Ensure that AAP and core people-related issues indicators are included in the response plan.**

RESPONSE

Implementation puts into practice the objectives as defined in the Humanitarian Response Plan, further taking into account the coordination architecture of the response, showing how organization, agencies and donors will cooperate with national authorities to achieve the response's objectives and how gaps in coverage or capacity will be filled.

KEY MINIMUM STEPS

RESPONSIBILITY

FURTHER RESOURCES

Work with partners to develop a coherent strategy on targeting and selection of affected women, men, girls and boys, including older people and persons with disability.

Strategy should include:
• Clear link to assessment findings
• Consultations with affected communities regarding the process and local considerations
• Participation strategy that ensures safeguards against corruption, nepotism, and SEA
• Routine collection of SADD
• Commitment to making criteria, selection process and means to raise complaints public and accessible to all affected community, excepting only in situations where to do so would pose a plausible threat to safety.

UNHCR guidance note on AAP and Protection in the HPC

Ensure ongoing awareness raising and capacity building amongst partners through utilization of specialist and peer expertise in cluster forums and other means, on such issues as:
• AAP commitments, communicating with communities (CwC), gender, age, disability, diversity, protection
• Code of Conduct, PSEA, community rights and entitlements, safe distribution
• Building community relationships through the design and operation of programmes.

RESOURCE MOBILIZATION

KEY MINIMUM STEPS

1. Explore possibilities for engaging specialist staff to work collectively with partners and other stakeholders on AAP, CwC, core people-related issues and protection, whether through Stand By Partners, secondments from partner agencies or short term missions.

2. Partners liaise and incorporate budget lines for required activities to mainstream AAP and core people-related issues.

MONITORING & EVALUATION

Humanitarian response monitoring is a continuous process and the frequency of data collection and reporting will vary at different stages of an emergency. Humanitarian actors should monitor the quality of the response on an ongoing basis and report problems with delivery. The overall purpose of monitoring and evaluation should be to ensure that organizations involved in the response remain accountable to affected people, national authorities, donors and the general public, and that they continuously improve.

KEY MINIMUM STEPS

1. Ensure integration of a realistic number of relevant and contextualized indicators on AAP and core people-related issues across all major response processes, for e.g.; HRP, 3/4Ws, post distribution and programme monitoring, beneficiary contact monitoring, CMAM, IYCF-E and Micronutrient programme monitoring formats, nutrition surveys, and evaluations, and that analysis and information produced disaggregates data and highlights feedback and learning.

2. Perform a collective cluster review exercise, linked with cluster performance monitoring, that includes community consultations / listening exercises to review collective strengths and weaknesses in the response against quality commitments and to guide improvements.

3. Share findings, tools, data, lessons learned and good practices with the global clusters for further dissemination.
