

ROOM CMWG: From reaction to prevention: anticipatory action against food crises

Challenges for Cash and Markets in relation to anticipatory action, climate and environmental issues?

Coordination, adding additional amounts for fuel, and other needs to prevent environmentally unfriendly measures, in the MEB.

ROOM CMWG: From reaction to prevention: anticipatory action against food crises

what are the opportunities for CMWG to engage in Anticipatory Action, Climate Change and environmental issues

learning from initiatives such as B-Ready via in-depth case studies/webinars

Documentation of best practices and challenges of some anticipatory actions.

how do we integrate local knowledge and expertise to inform anticipatory action

Increased funding for piloting new technologies, for more innovative and efficient cash distributions

aligning CWMG to the priorities of national government. Improve engagement and alignment with government

Engaging with the CaLP CoP and identifying FSL activities to collaborate on

Make sure that emerging environmental standards could realistically be implemented at the field level and in line with people choices and preferences.

Sharing of existing case studies and learning in these areas

Sharing existing lessons learned

We need the evidence that Anticipatory Action works to be widely disseminated especially to funders

activities must be aligned with the gov priorities

Adding "environmental costs" to the MEB

Anticipatory Action is new concept off late. will be good to share with partners the best practices, challenges and lessons learnt including the audience as donors

Market assessments and environment -how can we incorporate aspects

understanding the landscape better. What are partners doing, what are governments doing

advanced technological and science based early warning systems
