De-duplication Exercise

De-duplication Exercise

In order to effectively use the limited resources available to organizations while ensuring humanitarian food and livelihoods assistance reach the most vulnerable population, it is important to minimize and eventually stop any form of duplication in providing assistance.

The Food Security Cluster will prioritize the de-duplication exercise using the 5Ws reporting tool in identifying potential duplication and strengthening inter-organizational collaborations.

Below examples are extract from the FSC 5Ws showing potential duplication and what is NOT duplication.

District	Specific Location	Organization	Type of Activity
Beletweyne	Adiley	WFP	Providing cash to most Vulnerable population to meet their basic food needs
Beletweyne	Adiley	SCI	Relief - General Food Assistance (GFA)
District	Specific Location	Organization	Type of Activity
Beletweyne	Baaslaawe	WFP	Food Assistance for Asset
Beletweyne	Baaslaawe	DRC	distribution of seeds, hand tools,fuel for irrigation and GAP training.

De-duplication Exercise

- **How do we manage duplication?**
 - The National FSC **consolidated partner plans** which will be analyzed to identify areas with multiple partner interest.
 - Moving forward, the FSC **encourages a “1 partner per operational zone” system**, this will allow for geographic distribution of area of coverage for each partner.
 - The FSC advocates and encourages **partners to coordinate closely with the cluster before starting a project** to provide partner presence and gap information for better decision-making on where to implement their activities.
 - **5Ws Reporting**: providing **georeferencing (Lat/Long)** through the 5Ws is mandatory for reporting while providing each **specific location name** in a separate row. Same with providing **accurate number of new registered beneficiaries** (individuals and not HHs) by month. In February will we have to return those 5Ws to partners who haven't provided this two information.

- **Nutrition and Food referral systems**
 - District-level meetings on strengthening referral and integration tracking tools amongst Food Security and Nutrition Cluster partners
 - Beletweyne district meeting held last week; low referrals and disaggregation issues were identified as major challenges. Nutrition cluster is already working with its partners to improve referral reporting.
 - Identifying gaps and seek solutions
