In 2021, the FSL Cluster will provide humanitarian life-saving assistance to 5.7 million South Sudanese people, a 7.5 per cent increase from the 5.3 million targeted in the 2020 HRP. The FSL Cluster used the IPC analysis to inform its targeting. The cluster will target all people in need of food and livelihood support in IPC Phases 3, 4 and 5, and 42 per cent of the FSL people in need in IPC Phase 3. Some 4 million people are targeted through the first objective, 5.7 million people through the second, and 500,000 households targeted through the third objective.

FSL partners will provide assistance to people in need through in-kind assistance, CVA or a combination of both. The modality is determined by the principles of feasibility, effectiveness, efficiency, economy and safety. Some 1.6 million people will be targeted with unconditional and conditional CVA. Unconditional cash is predominantly used for purchasing food while conditional CVA for nutrition support, seed trade fairs, cash for work social safety net programmes and small cash grants for asset building. A total of $80 million for cash programming will be implemented through 37 partners.

Output-level indicators such as number of beneficiaries receiving food and livelihood kits, number of livestock vaccinated and number of individuals attending training will be monitored through the 5W system on a monthly basis.
