**FSC Target Logic**

The target for each district region shown on this map can be considered as an "indicative" monthly target. FSC calculates it based on the population figures given for the IPC phases as assessed by the FSNAU. The targets are arrived at by adding:

- 50% stressed of IDP population
- 50% stressed of rural population
- 50% stressed of urban population

This targets are indicative, but it does not prevent them from going beyond the target if the local context warrants it.

The boundaries and names shown and the designations used on this map do not imply official endorsement or acceptance by the United Nations.
