# Balcad Flood Updates – FSC

# Balcad Flood Updates

- On 12 July, the Hawaadleey water reservoir of Balcad district burst its perimeter and caused an ongoing flood which has now affected 4,294 households in 19 villages with an estimated 20,105 hectares of ready-to-harvest farmland now submerged in water.
- The villages affected by the floods in Balcad district are not accessible to humanitarian partners due to significant presence of non-state actors.
- A multi-cluster rapid needs assessment was conducted in only Balcad town (26-27 July) to monitor the IDP influx in the last week and ascertain their needs and priorities.

# Balcad Flood Updates

- It is estimated that around 1,700 households arrived in Balcad town, out of which about 700 households are in two newly established IDP sites in the town while others are integrated within the host communities and the protracted IDPs.
- **Shelter, WASH and Food Security are considered priority needs.**
- WFP colleagues in the field mentioned they are planning to distribute high energy biscuits to 1,700 flood displaced families in Balcad.

Partner updates (Flood  
response plan, challenges  
and gaps)

## Next Meetings

- **Hiran Regional RCM:** 5th September 2023 (2:00PM-3:30PM)
