During the reporting period, approximately 4 million people were supported with various food security interventions. Of this, over 2 million unique individuals were assisted with Food Assistance (in-kind and cash based transfers) and over 2 million with Agricultural Livelihood support in Adamawa, Borno, and Yobe states of north east Nigeria. Of this 28% of beneficiaries being assisted with cash or vouchers based interventions.

The Food Security Sector recently updated its intervention target following the November 2017 Cadre Harmonise analysis, to reflect the new projection (June – August 2018) figure of 3.7 million people in phase 3 to 5 in need of food security assistance. This figure does not take into account four LGAs where data was not available due to access challenges.
