## Q2.3 - Write any comments or information you wish to add on how the cluster supports service delivery

The cluster should encourage bilateral interactions between actors implementing similar activities

For the Partners' presence and gap analysis, provide further details on geographical areas, so far it is only LGA level which is a too large administration level. alternatively, allow access to that data for partners who need it. Interactive dashboard: so far I haven't see the interactive dashboard, maybe the interactive dashboard would allow zooming in a particular LGA for further details on for example, the presence of partners and needs gap at lower administrative levels

Overall, the food security sector in Nigeria have been very supportive by providing timely contextual information. And serve as umbrella that housed partners by establishing contacts strengthening the existing network. Well done.

It is very good. The meeting place becomes suffocated due to high temperature because of congested space.

Strengthen coordination among partners and most especially government. The dashboard should simplify than it is now for better understanding.

The coordination is good enough, and should be kept up

Meetings are usally rushed through, would be good to reduce ferquency but increase discussions time

I observe. That many members leave the meeting before it is over. This is counter productive and needs to be addressed. Y asking participants/ partners to send representatives who will stay until after the meeting is over.

The Sector does not give updates on the status of HRP's submitted by partners each year, so its difficult to know if one's HRP has attracted interest or not and areas for improvement.

None

The cluster is very instrumental in providing a platform for partners to provide updates ,challenges, assessment reports. Also information is collected at the organization level to interpret into maps for gap analysis and prevent duplication in service delivery.

We need meetings to be atleast 45 minutes to ensure all present participate

The cluster coordination is very well coordinated. The cluster coordinator is professional and responsive.

The cluster has been active even during COVID-19.

The Food Security cluster has been very supportive in all aspect of the Food security humanitarian assistance in Nigeria

The Food Security Sector has been outstanding really.

The cluster is a major source of food security information and support. The team responses to the need of the members and coordinates and engages with partners to areas where need populations are reported to ensure that vulnerable people get food assistance

satisfactory and always be open for new ideas.

Excellent

Overall the cluster service delivery is satisfactory and encourage to continue the good job. Well done.

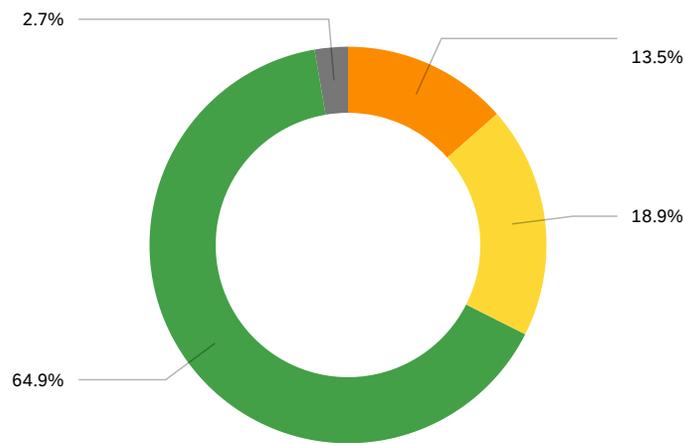

Updates of the meeting should always be share with partners within an appropriate time.

It is a platform that brings partners together as a family. We receive and share information that are helpful to all. This platform gives members a worth of experience ,as we learn from each other. It reduce duplication of effort and promote team work.

Sector meetings to be stepped down to include local CBOs

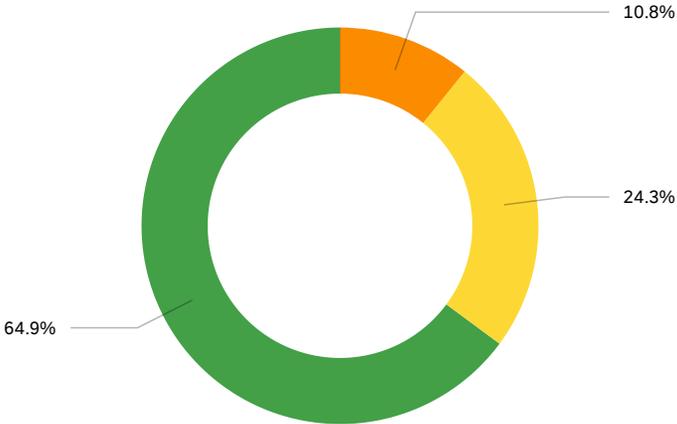

All activities are Commendable

The cluster regularly requests for information from my organization regarding the activities being implemented

Through the monthly 5Ws, the FSS monitors the achievement by the different partners for each Specific Objective and Result

Resource and information from the cluster has been very helpful in our monthly food security outlook updates (FSOU).

Monitoring should be a joint assignment not as a single or two org should be doing that

No comments

None

Satisfactory

Some partners dont submit their information which limits the amount of information the sector can share across. Others are quite late, there is need to include timeliness in information.

Food Security Cluster information products and updates, and response planning influenced my organization's decisions and intervention plans in a positive manner.

Monitoring, evaluation and reporting are key in FSS.

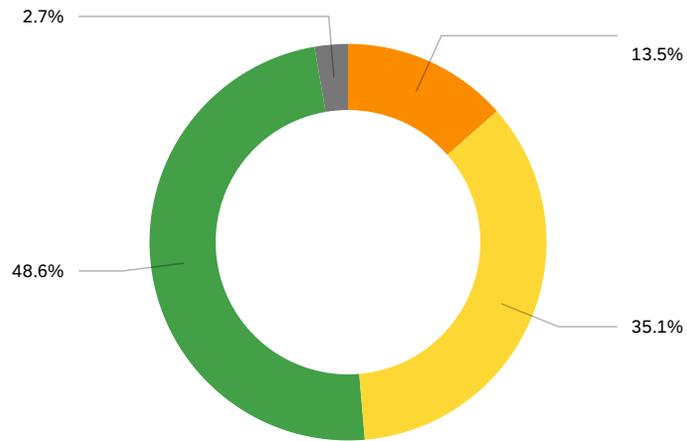

Excellent

NA

Most outcomes of monitoring and evaluation processes are not shared with local partners,hence there are always gaps in local partners capacity enhancement

None

Advocacy activities are done

No comment

Engaging with donors and government has been key by the sector.

The Food Security Cluster work hard to carry out good advocacy within and outside the country.

The cluster plays a major role in advocating for the affected populations

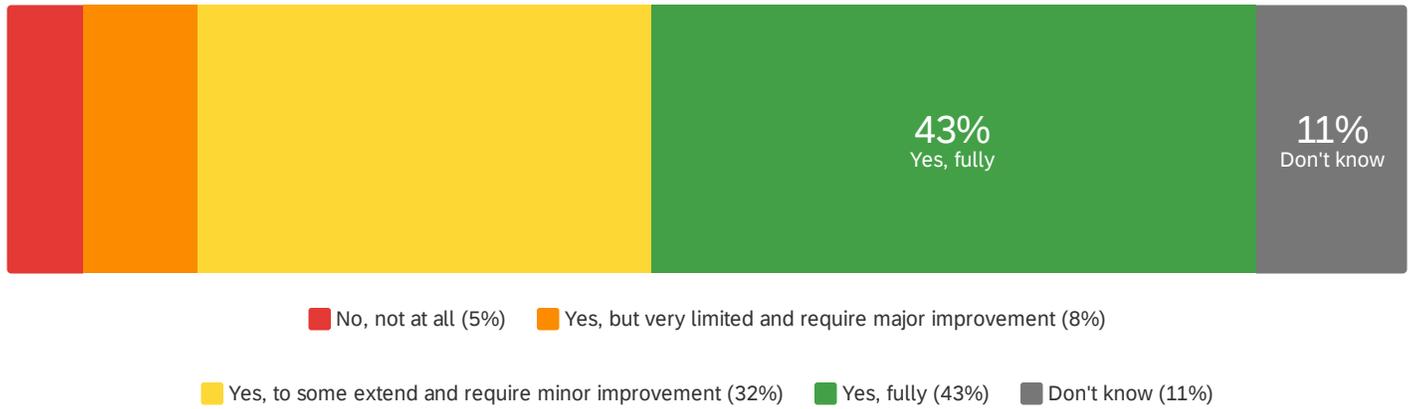

Strengthen the strategy of its guidelines.

NA

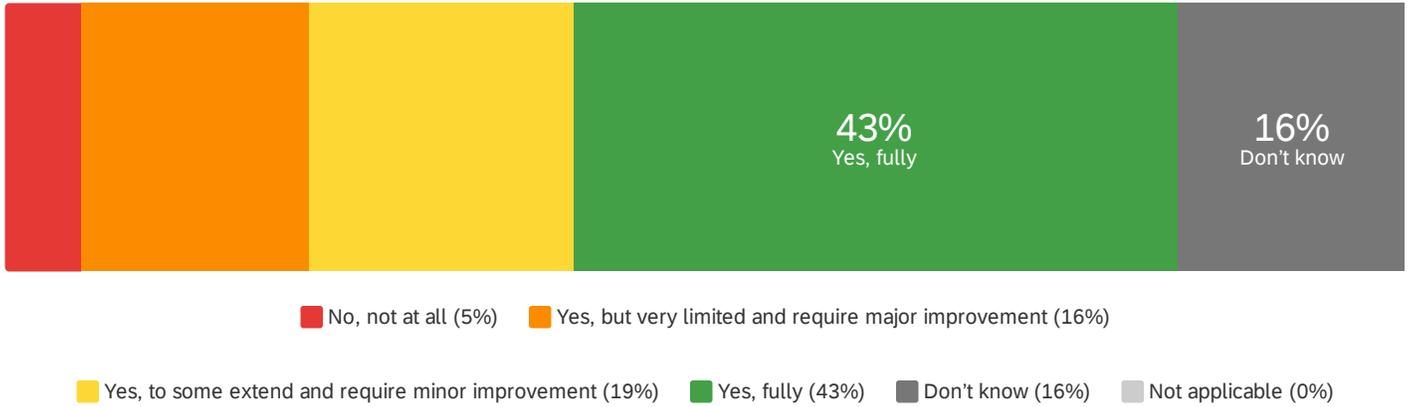

The bigger donor agencies INGOs and UN agencies seem to go their separate ways in project activities
