

2023 HNO

Coastal Area

Tartous
Lattakia

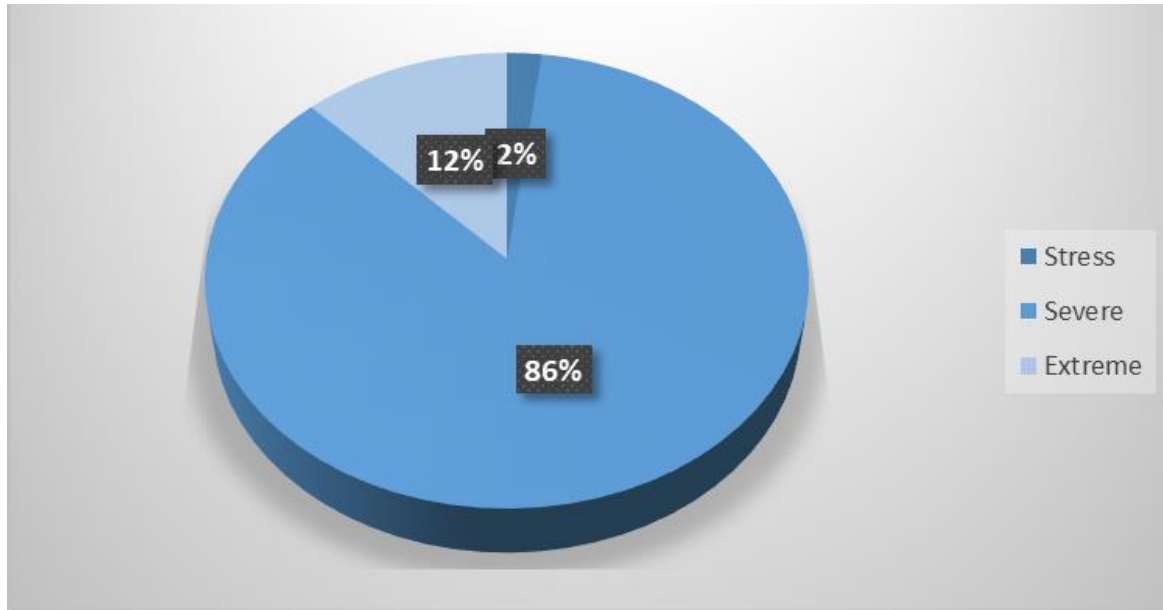

Overview – Coastal Area

Governorate	Total Population	Food Insecure	Total # food insecure	# at Risk of Food Insecurity	% at Risk of Food Insecurity
Lattakia	1,295,334	41%	531,148	212,070	16%
Tartous	948,274	40%	380,545	136,335	14%
Total	2,243,608	41%	911,693	348,405	15%

Severity Ranking

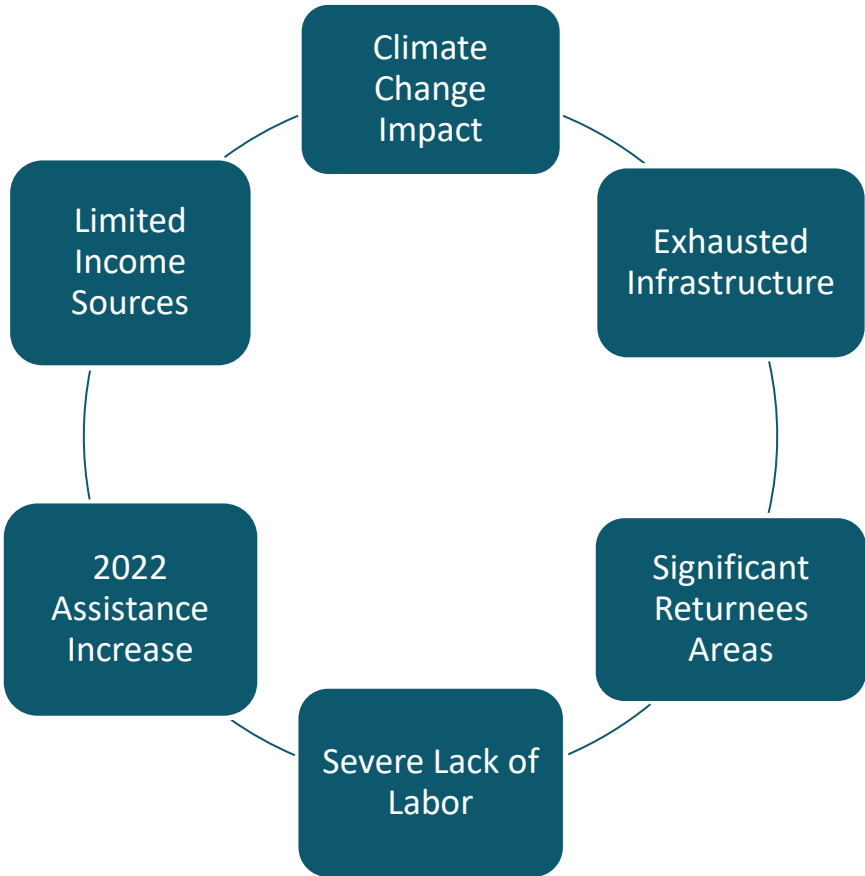

49 covered sub-districts

- 1 SD's "Stress"
- 42 SD's "Severe"
- 6 SD's "Extreme"

Contextual Overview

Agro – Climatic Indicator

All sub-districts in both Tartous and Lattakia governorates have been scored 2 for the Agro-climatic score indicator. This is not considering the significant impact of climatic changes as delayed raining seasons, heatwave seasons, increased pattern of wildfires, increased pattern of frosting and flooding. These have been repeatedly witnessed and can be expected for the coming years and have direct impact on food security situation.

- Request to review the scoring of 22 sub-districts from score 2 to score 4 (12 sub-districts in Tartous and 10 in Lattakia)
- Request to review the scoring of 11 sub-districts from score 2 to score 5 (7 sub-districts in Tartous and 4 in Lattakia)
- Request to review remaining subdistricts from 2 to 3

Intensity of Hostilities Indicator

Request to review the indicator “Intensity of Hostility score” for the following sub-districts:

- Lattakia – Airstrikes on the Lattakia port occurred during the year and have had a significant impact on operations related to food assistance in addition to more general access to food. The port remains a clear strategic target and hostility risks remain high.
- Jablah – The presence of military base and air defence base has a significant risk in relation to hostility.
- AlHaffah – The eastern side is an active front of missile attacks
- Mashta Elhiu – Airstrikes occurred during the past year
- Hameidiyyeh – Airstrikes occurred during the past year
- Safita – Airstrikes occurred during the past year
- Dreikish – Airstrikes occurred during the past year

Essential Expenditure Share Indicator

CARI Vs EES

Population Review

Population figures in 8 sub-districts in Lattakia and 2 sub-districts in Tartous. Based on assessment available at Field level, there is strong evidence of variances between existing OCHA population figures used for the calculation of the PIN 2023 and the actual population in the sub-districts. It is requested to review population numbers and accordingly PIN for 2023.

Focus on Tartous & Dreikish Districts

Governorate	District	Sub District	2022 PIN%	2022 PIN #	Population 2021	Population 2022	2023 PIN%	2023 PIN #	At Risk %	At Risk #	Revised PIN %	Revised PIN #
Tartous	Tartous	Tartous	55%	170,183	307,112	309,972	34%	104,276	13%	41,425	36%	112,480

Additional Points

- Kasab sub-district is currently categorized at stress level. The CARI score of 1 is arguable compared to existing assessments while we have limited access result show major changes which are hardly justifiable.
The sub-district is near sub-district with high level of hostility.
- In the 4 sub-districts where the alternative methodology was used, we request calculation of population at risk percentage which is currently not available.
- Kansaba sub-district currently has a score of 1 for % of IDPs and returnees while existing assessments (including population data shown on previous slide) and on the ground presence report high number of returnees in the sub-district. We request a revision of the score for the % IDPs-Returnees score from 1 to 2.

Additional Points

- CBS has not provided any information on reasons behind not conducting surveys in 4 sub-districts (Anaza, Qadmous, Hamam Wasil, Tawahin) while has reportedly conducted interviews sub-district in proximity (i.e. Baramanet Elmashayekh) and has reported significant improvement and changes in the food security level of this area which are hardly justifiable. We request better understanding of the reasons for the use of alternative methodology and review of the validity of data from Baramanet Elmashayekh.

Governorate	District	Subdistrict	Total Pop 2022 May	Final PIN 2022 %	# Final PIN	People at risk %	People at risk #	PIN variance	PIN Variance
Tartous	Qadmous	Qadmous	26,369	59%	15,667	#N/A	#N/A	4%	1,171
Tartous	Sheikh Badr	Baramanet Elmashayekh	20,684	37%	7,661	22%	4,596	-55%	11,520

Thank you!
