FSC Updates: Rationale for calculation of Cash Transfer Value

- CWG has been working with GoM (INGC) to explore use of cash for food assistance
- CWG developed a rationale for the calculation of cash transfer value base on food basket (75% energy requirements) as per food security cluster standard operating procedure (SOP).
- Indicative cash transfer value base on the rationale and current prices ranges between MT 3,400 to 3,600MT
- The above rationale for calculation was already endorsed by a committee (INGC)
- FSC (National) endorsed the rationale during 20 Feb meeting and the CWG will take the discussion forward with GoM higher level.

IM Update

Information Management

Issues:

• Reporting to the 4W has become increasingly late. Many partners are reporting after the 10th.
• Many IMO in partnering agencies and other clusters, are finishing their missions with uncertain plans for continuity.
• The coming months will see significant down scaling for IMO capacity in Mozambique. This will impact reporting.

• Updates:
• The IMWG will be doing a training on data visualization in Late March. We will circulate out surveys and schedule next week.
• New FSC National IMO hiring process: Candidates have been short listed and sent for testing.
• 4W Matrix was posted to the FSC website and shared with the cluster.

The FSC Contact List/Directory and 4W Matrix, have been updated and posted to the following websites:

• HRINFO: https://www.humanitarianresponse.info/en/operations/mozambique/food-security
• Food Security Cluster: https://fscluster.org/mozambique/documents

Deadline for submission: 5th of each month
